

S5850-24S2C Switch

IDEAL FOR ENTERPRISE, DATA CENTER AND METRO NETWORKS

Overview

S5850-24S2C switch is high performance Ethernet switch to meet next generation Metro, Data Center and Enterprise network requirements, which support L2/ L3/ IPv6/ Data Center/Metro features. The switch comes with complete system software with comprehensive protocols and applications to facilitate rapid service deployment and management for both traditional L2/L3 networks and Data Center networks.

S5850-24S2C switch is cost-effective Ethernet access and aggregation platform to Enterprise, Data Center and Metro application. The S5850-24S2C switch is also ready for IPv6 deployment.

Benefits

- Layer 3 Switch
- With 2 × 100Gb QSFP28 Uplinks
- Support MLAG, EVPN, SR-MPLS, etc.
- Completed IPv4/IPv6 Protocol Stack
- Multiple IPv4/IPv6 Tunnel Technique
- Data Center DCB features (PFC/ECN/ETS)
- Ethernet OAM (IEEE802.3ah and IEEE802.1ag)
- RPC-API

Key Features

Intelligent Ethernet OAM

With the IEEE802.1ag and ITU-T Y.1731 end-to-end OAM, Ethernet service providers can monitor the services, survey the end-to-end performance and ensure the service quality match the agreement.

The fault management technique includes CCM, LTM and LBM. Performance targets include measure for latency and jitter.

Support remote management, network monitoring, network fault indication, remote loopback and MIB parameter retrieval according to the standard 802.3ah EFM.

Data Center Features

Support leading edge Data Center features: Priority Flow Control (PFC), explicit Congestion Notification (ECN) and Data Center TCP, etc. Support MLAG (Multi-Chassis Link Aggregation) to aggregate links across different devices. MLAG can build an Active-Active system to improve the reliability of the network links from single board grade to device grade.

Support overlay technology (include NVGRE/VXLAN/GENEVE, etc.). Overlay can make layer 2 packets across the layer 3 networks by using NVGRE/VXLAN/GENEVE header to encapsulate the entire ethernet packets. Overlay resolves the problem of MAC table size limitation in traditional layer 2 networks, resolves the problem of VLAN id count limitation, and resolves the problem network dynamic adjustment which cannot achieve by VLAN/VPN.

Support RPC-API.

High Reliability

Support 1+1 load-sharing AC power supplies and 2+1 redundant variable-speed fans as standard features, protecting the switch from a single power supply or fan failure. Support real-time environment monitoring technology to detect the chipset temperature, status of fan and power, etc.

Support LACP/ECMP/VRRP/VARP/STP/RSTP/MSTP/Smart Link/BFD/ERPS/G.8031/G.8032/Load-Balancing, etc. to protect the network traffic all-around effectively.

Support patented technology "Sysmon" for CPU status monitoring can take action when system is error.

Outstanding QoS Control

Provide 13 hardware queues per-port (8 unicast queues, 4 multicast queues and 1 monitor queue).

Support multi-stage scheduling technology such as WDRR (Weighted Deficit Round Robin)/SP (Strict Priority) and TD (Tail Drop)/WRED (Weighted Random Early Detection) to prevent congestion.

Support flexible queue scheduling mechanism to do the shaping for queue or port traffic.

Support ingress and egress policer for intelligent bandwidth monitoring.

Support srTCM (Single Rate Three Color Marker) and trTCM (Two Rate Three Color Marker)

Key Features

Triple-play Service Support

Offer high bandwidth for Triple- Play services such as IPTV, video monitoring. The built-in QoS capabilities and flexible queuing technologies guarantee high quality of services.

Support rich multicast protocol set (IGMP Snooping, IGMP v 1/v2/v3, PIM-SM).

Support up to 2K multicast groups and 4K logical replications per group.

Support IPTV service and multicast latency control.

Comprehensive Network Security Policy

Support subscriber-class/switch-class/network-class security control.

IPv4/ IPv6/MAC ACL can filter IPv4/ IPv6/ Non- IP packet respectively. Besides that, extended IPv4/ IPv6 ACL which can match Layer 2/Layer 3/Layer 4 information in one rule is available. The ACLs can apply to physical ports/vlan/port group/vlan group. The members of port group or vlan group share a set of ACLs and save the TCAM resource.

ARP Inspection and IP Source Guard features prevent network from malicious ARP attack.

Support CPU Traffic Protection, Storm Control and CPU load optimization features.

Support centralized 802.1x authentication feature to forbidden illegal user accessing network.

Convenient Management Features

Support varied management interfaces, including console port/inband network ports/outband network port/USB port.

Support CLI (Command Line Interface), web management, Telnet and FTP connection.

Support SNMPv 1/v2/v3, SSH2.0, SSL and OAM.

Technical Specification

S5850-24S2C switch comes with advanced hardware architecture design and abundant L2 and L3 features. Here's a look at the details.

CHARACTERISTICS

S5850-24S2C

Ports

Ports	24x 1/10G SFP+, 2x 40/100G QSFP28
-------	--------------------------------------

Max. 100G Ports	2
-----------------	---

Max. 40G Ports	-
----------------	---

Max. 10G Ports	24
----------------	----

Max. 1G Ports	-
---------------	---

Console Port	1
--------------	---

Ethernet Management Port	1
--------------------------	---

USB Port	1
----------	---

Operating System

OS	FSOS
----	------

Key Components

CPU	SOC(Dual core/ARM A53)
-----	------------------------

Performance

Layer Type	Layer 3
------------	---------

Switching Capacity	880 Gbps
--------------------	----------

Forwarding Rate	540 Mpps
-----------------	----------

CHARACTERISTICS

	S5850-24S2C
Max./Min. Latency	0.96μs/0.66μs
DDRIII Capacity	1GB
Flash Memory	8GB
System Memory	2GB
RAM	2GB
Packet Buffer	9MB
Jumbo Frame	9.6K
MLAG	Support
MAC Address	96K
Number of VLANs	4K
MTBF (Hours)	206,988
Authentication Methods	802.1X, AAA
Remote Management Protocol	SNMP, RMON, HTTP, Telnet, SSH
Status Indicators	System, LINK activity, FAN, PWR, MGMT
Power	
Input Voltage	-48 ~-60V
Typical Power Consumption	53W
Max. Power Consumption	59W

CHARACTERISTICS

S5850-24S2C

Physical and Environmental

Dimensions (HxWxD)	1.73"x 17.5"x 14.6" (43.6x440x370mm)
Rack Space	1U
Hot-swappable Power Supplies	2 (1+ 1 Redundancy)
Hot-swappable Fans	3 Fixed Fans
Airflow	Front-to-Back
Acoustic Noise	50dB
Operating Temperature	32°F to 113°F (0°C to 45°C)
Storage Temperature	-40°F to 158°F (-40°C to 70°C)
Operating Humidity	10% to 90% (Non-condensing)
Storage Humidity	0 to 95% (Non-condensing)
Weight	5.95kg
Warranty	
Warranty	5 Years

FEATURES

Functionality	Description
Ethernet Features	<ul style="list-style-type: none"> • Support full duplex, half duplex, and auto-negotiation duplex • Support auto-negotiation port speed • Support Jumbo Frame • Support Flow Control • Support Storm Control • Support Port-block • Support Port-isolate • Support L2 Protocol Tunneling
VLAN Features	<ul style="list-style-type: none"> • Support 4094 VLANs • Support VLAN access mode: Access/Trunk • Support Default VLAN • Support VLAN Classification • Support basic QinQ, selective QinQ and VLAN Mapping • Support VLAN statistics • Support Private VLAN • Support Guest VLAN • Support Voice VLAN
MAC Address Table	<ul style="list-style-type: none"> • Support static MAC address • Support dynamic MAC address learning and aging • Support hardware learning • Support black hole MAC address • Support MAC address drift detect
Link Aggregation	<ul style="list-style-type: none"> • Support static link aggregation • Support LACP • Support static load balancing (SLB) • Support dynamic load balancing (DLB) • Support Round-Robin (RR) • Support Self-healing)
Reliability Features	<ul style="list-style-type: none"> • Support STP/RSTP/MSTP protocol • Support STP Protocol Protection (BPDU Filter/Guard, Root Guard, Loop Guard, Anti TC-BPDU attack) • Support single ERPS ring/tangent ERPS rings/intersecting ERPS rings • Support ERPS compatible with RRPP • Support G.8031 • Support G.8032 • Support port Loopback Detect

FEATURES

Functionality	Description
Reliability Features	<ul style="list-style-type: none"> • Support BFD • Support VRRP • Support Multi-link • Support Smart-link • Support MLAG • Support Ethernet OAM (EFM/CFM/Y.1731) • Support Software class process monitoring (Sysmon) • Support Hardware Watch Dog
ARP Features	<ul style="list-style-type: none"> • Support static ARP • Support dynamic ARP leaning and aging • Support Gratuitous ARP • Support basic ARP-Proxy and local ARP-Proxy
IPv4 Forwarding	<ul style="list-style-type: none"> • Support IPv4 static routes • Support IPv4 static routes co-work with IP SLA • Support VRF • Support uRPF check • Support RIPv 1, RIPv2 • Support OSPFv2 • Support IS-IS • Support BGP • Support Route-map and Prefix list • Support Policy-based Routing (PBR) • Support ICMP redirect • Support PMTU • Support ICMP unreachable message • Support RIPng • Support ECMP
IPv6 Forwarding	<ul style="list-style-type: none"> • Support ICMPv6 • Support NDP • Support PMTU • Support IPv6 static routes • Support RIPng • Support OSPFv3 • Support IPv6 over IPv4 Tunnel • Support 6to4 Tunnel • Support ISTAP Tunnel • Support DHCPv6

FEATURES

Functionality	Description
IPv6 Forwarding	<ul style="list-style-type: none"> • Support IPv6 prefix list • Support IS-IS
Multicast Features	<ul style="list-style-type: none"> • Support IGMP v 1/v2/v3 • Support IGMP agent • Support IGMP SSM Mapping • Support PIM-SM,PIM-SSM,PIM-DM • Support MLDv 1/v2, MLDv 1/v2 snooping • Support MVR and MVR6 • Support PIM-SMv6
Data Center Features	<ul style="list-style-type: none"> • Support VARP • Support VXLAN • Support GRE Tunnel • Support NVGRE Tunnel • Support GENEVE Tunnel • Support DCBX • Support priority-based flow control (PFC) • Support EVPN
QoS Features	<ul style="list-style-type: none"> • Support traffic classification based on COS/DSCP (simple classification) • Support traffic classification based on ACL (complex classification) • Support queue scheduling based on traffic classification • Support Remark the priority fields(COS/DSCP) of the packet • Support flow redirection • Support flow mirror • Support traffic policing • Support traffic shaping • Support traffic statistics • Support SP (Strict Priority) scheduling • Support WDRR (Weighted Deficit Round Robin) scheduling • Support SP+WDRR mixed scheduling • Support TD (Tail Drop) • Support WRED (Weighted Random Early Detection) • Support ECN tags based on TD, WRED and shape rate

FEATURES

Functionality	Description
Security Features	<ul style="list-style-type: none"> • Support SSH • Support Radius • Support TACAS+ • Support AAA • Support port based dot1x and MAC based dot1x • Support configure dot1x Guest via command or Radius server • Support access control list (ACL) • Support traffic classification based on source and destination IP/source and destination MAC/source and destination layer for protocol num/VLAN ID • Support ACL matching User defined fields (UDF) • Support ACL active based on Time-Range • Support ARP inspection • Support IP source guard • Support port security to limit the MAC address learning on interface • Support VLAN security to limit the MAC address learning on interface • Support CPU Traffic Limit • Support Prevent DDOS attack • Support ACL filtering Telnet/SSH login • Support Link-Flapping detection
MPLS Features (With “ma” License)	<ul style="list-style-type: none"> • Support MPLS Forwarding • Support VPWS • Support VPLS • Support MPLS OAM • Support MPLS Stats • Support L3VPN • Support MPLS ACL • Support MPLS QoS
Configuration and Maintenance	<ul style="list-style-type: none"> • Support DHCP Server • Support DHCP Relay • Support DHCP Snooping • Support DHCP Client • Support DHCP Option82 • Support RMON • Support sFlow • Support IP SLA • Support IPFIX • Support Latency/Buffer Monitor • Support EFD (Elephant Flow Detection)

FEATURES

Functionality	Description
Configuration and Maintenance	<ul style="list-style-type: none"> • Support NTP • Support port Errdisable state detection and recovery • Support configure static DNS client • Support LLDP • Support port loopback • Support hardware loopback (internal/external) • Support to configure system time • Support to configure time zone
Debugging Features	<ul style="list-style-type: none"> • Support Debug based on modules • Support CPU/memory usage display and alarm • Support Device temperature/PSU/FAN/status display and alarm • Support user operation logs • Support Management of logs, alarms, and debugging information • Support VCT (Virtual Cable Test) • Support detailed diagnostic-information collection • Support reboot information logging
MPLS Features (With “ma” License)	<ul style="list-style-type: none"> • Support network diagnostics (ping/traceroute) • Support use port/vlan/cpu as mirror source • Support use port/port group/vlan/cpu as mirror destination • Support ERSPAN • Support to CPU/From CPU packets statistics • Support L2 ping • Support UDLD (Unidirectional Link Detection)
Management Features	<ul style="list-style-type: none"> • Support inband and outband management ports • Support privileged user priority and privileged commands • Support Network management based on SNMPv 1/v2c/v3 • Support Public and private MIB • Support Public and private Trap • Support Configuration and management based on WEB UI • Support Configuration and management based on RPC-API • Support SmartConfig (Automatically configuration when system start) • Support OVSDB • Support change the system specifications by choose different STM Profiles • Support feature configuration based on License • Support restore factory default configuration • Support manual/schedule reboot

FEATURES

Functionality	Description
Management Features	<ul style="list-style-type: none">• Support upgrade with the local image file/remote TFTP server• Support online upgrade Unboot
File System	<ul style="list-style-type: none">• Support file system to manage the files and directories• Support upload/download files via FTP/TFTP• Support transmit files via Xmodem
