

Evolve Your Campus Network with FS Campus Switches

FS Campus Switches are ideal for building secure, smart, and robust campus networks.

Future-Proof Your Campus Network Experience

Top-Notch Experiences

Stackable design, hot-swappable dual redundant power supplies and fans, providing a high-stability network.

Flexible Deployment

Flexible combinations of 10/25/40/100G ports for high-density access and multi-scenario deployment.

Simplified Management

Support WEB/CLI/SNMP/SSH, easy to learn and use, streamlining deployment, operation, maintenance, and management.

Featured Products and Benefits

• Lan Access Switches •

Stackable access switches with a maximum of 48 ports, designed for high-density and multi-scenario end-user access, helping enterprises reduce costs while improving operational efficiency.

• Core and Distribution Switches •

Ideal for large-scale campus network aggregations, small and medium-sized network cores, meeting the needs of high-speed, safe, intelligent enterprise networks.

• Industrial Ethernet Switches •

Specifically built for harsh industrial and outdoor environments, ensuring flawless operation and failover protection.

• SMB and PoE Switches •

Fit for a variety of daily scenarios by powering and connecting IP phones, wireless APs, and video surveillance cameras, offering an affordable and simple network solution.
