

AP-W6T6817C Access Point Datasheet

6817Mbps 4x4 MU-MIMO Tri-Band Broadcom Chip Gigabit Wi-Fi 6 Access Point

Overview

The Wi-Fi 6 (802.11ax) Access Point (AP) supports 4 x 4 MU-MIMO, and can simultaneously deliver services on the one 2.4GHz and two 5GHz bands, achieving a maximum rate of up to 6817Mbps.

With built-in smart antennas that enable signals to follow Stations (STAs), providing better coverage, the AP is ideal for high-density scenarios such as midsize and large enterprise offices, education institutions, and business spaces.

Benefits

- 802.11ax Standard, up to 6817Mbps
- Built-in 4x4 MIMO Antenna
- Max 1536 Client Connections
- Multi-gigabit Port
- 802.3af/at PoE
- FAT/FIT AP

Key Features

Super Fast Wireless Access, Higher Energy Efficiency and Reliability

- **1024-QAM High-Speed Access**

The AP adopts the tri-band design and complies with the next-generation Wi-Fi standard 802.11ax. When the tri-band are all enabled, the AP can provide a maximum wireless access rate of 6817Mbps, bringing high-speed access experience.

- **OFDMA High-Density User Access**

The AP can conduct scheduling to allow multiple users to receive and send packets concurrently, reducing user competition and backoff, shortening the network delay, and improving network efficiency.

- **Spatial Reuse with BSS Color**

This technology implements channel reuse in high-density scenarios and greatly eases frequency interference in actual network deployment.

- **Environment Protection and Lower Power Consumption**

The AP incorporates various new energy saving technologies, including the single-antenna standby technology, dynamic MIMO power saving technology, enhanced automatic power saving transmission technology, and packet-based power control technology. With these technologies as well as high-performance power design, the AP is energy-efficient while providing high-speed wireless access service.

- **Intelligent Recognition Function**

The AP is capable of identifying smart mobile terminals (such as iOS and Android terminals) and PCs.

- **Intelligent Local Forwarding**

The AP integrates intelligent local forwarding technology and breaks through the bottleneck in the traffic of AC. The AC can be used to pre-configure the data forwarding mode for the AP. Then, this AP determines whether data needs to be forwarded by the AC based on the SSID name or user VLAN, or be sent to a wired network for data exchange.

- **Abundant QoS Policies**

The AP supports abundant QoS policies. It provides WLAN/AP/STA-based bandwidth limitation and supports Wi-Fi Multimedia (WMM) that defines priorities for different service data. The AP authentically implements timely and quantitative transmission of audio and video, and guarantees smooth application of multimedia services.

Comprehensive Security Protection and Ease of Use

- **Secure User Access**

The AP supports a wide range of user access authentication modes such as Web authentication, 802.1x authentication, MAC Address Bypass (MAB) authentication, and local authentication. Complying with the standard network access control standard, the AP strictly defines a set of network access control policies in terms of user access, authorization, host compliance check, network behavior monitoring, and network attack prevention. These control measures guarantee high network security for authenticated users.

- **Flexible Virtual AP Technology**

With the virtual AP technology, the AP supports up to 48 virtual APs, with each radio card supporting a maximum of 16 virtual APs. Network administrator can separately encrypt and isolate subnets or VLANs with the same SSID, and configure separate authentication mode and encryption mechanism for each SSID.

- **Comprehensive Wireless Security Protection**

Working with the AC, the AP is capable of offering a wide breath of wireless security protection features including the Wireless Intrusion Detection System (WIDS), RF interference tracking, rogue AP containment, anti-ARP spoofing, and DHCP protection. With these features, an authentically secure and reliable wireless network can be built for users.

Flexible Device Management Modes

- **Flexible Switching Between Fit Mode and Fat Mode**

The AP supports flexible switching between the fat mode and fit mode. In fit mode, the AP can be used after installation with zero configuration. The sound remote management greatly improves the operation, administration, maintenance (OAM) efficiency for wireless networks.

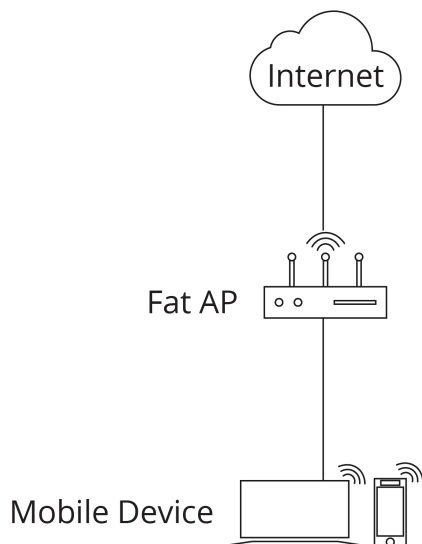

- **Web GUI Management**

The AP provides the AC and AP Web management GUI, on which O&M personnel can complete wireless configuration easily and manage the wireless network comprehensively. On the AC Web GUI, O&M personnel can manage the AP as well as STAs connected to the AP, and restrict the rates and network access behaviors of the STAs. With the GUI, O&M personnel can plan, manage, and maintain wireless networks conveniently.

Typical Networking

FAT AP

In the below networking, the AP-W6T6817C works as a fat AP to complete user access, authentication, data security, service forwarding, and QoS.

FIT AP

In the below networking, the AP-W6T6817C works as a fit AP to bearer bridge forwarding function, and the functions of user access, AP online, authentication, routing, AP management, security protocol, and QoS are completed by the AC.

Technical Specification

Wi-Fi 6 access point comes with advanced hardware architecture design. Here's a look at the details.

CHARACTERISTICS

AP-W6T6817C	
Ports	
Service Port	2x 10/100/1000 Mbps RJ45; 1x 10/100/1000 Mbps RJ45 (PoE);
Console Port	1
USB Port	USB 2.0 port
Key Components	
AP Chip	BCM49408+BCM43520+2*BCM43694
DRAM	1GB
Flash Memory	128MB
Radio Specifications	
2.4GHz Operating Bands	802.11b/g/n/ax: 2.4 GHz to 2.483 GHz
5GHz Operating Bands	802.11a/n/ac/ax: 5.150 GHz to 5.350 GHz, 5.47 GHz to 5.725 GHz, 5.725 GHz to 5.850 GHz (vary depending on different countries)
MIMO	2.4 GHz 11ax: 4x4 MIMO, 5 GHz 11ax: 4x4 MIMO, 5G 11ac: 2x2 MIMO
Spatial Streams	2.4GHz: 4x4:4, 5GHz:4x4:4, 5GHz:2x2:2
Antenna	Integrated antenna design
Antenna Gain	2.4G: 3dBi, 5G: 3dBi
Coverage Radius	30m (in an open environment)
Power	
Power Supply	802.3at PoE, compatible with 802.3af PoE (in case of 802.3af PoE, only radio 1 is available and the PSE PoE and USB functions are disabled); DC 48 V/0.6 A
Power Consumption	<25.5W
Transmit Power	≤100mw (20dBm)
Adjustable Power	1dBm
Physical and Environmental	
Installation Mode	Ceiling/wall-mountable
Bluetooth	Bluetooth 5.0

CHARACTERISTICS

	AP-W6T6817C
IP Rating	IP41
Reset Button	Support
Dimensions (HxWxD)	1.92"x8.66"x8.66" (48.85x220x220mm)
Operating Temperature	-10°C to 50°C
Storage Temperature	-40°C to 70°C
Operating Humidity	5% to 95% (non-condensing)
Storage Humidity	5% to 95% (non-condensing)
Warranty	
Warranty	3 Years

FEATURES

Functionality	Description
WLAN	<ul style="list-style-type: none"> • 802.11a/b/g/n/ac/ac Wave2/ax • Maximum throughput per AP: 6817Mbps • Radio 1: 2.4G 1150Mbps, Radio 2: 5G: 4800Mbps, Radio 3: 5G 867Mbps • Maximum number of allowed concurrent STAs: 1536 • Recommended number of connected STAs: 120 • Virtual APs: A maximum of 48 virtual APs, with 16 per band • SSID hiding • Separate authentication mode, encryption mechanism, and VLAN attributes for each SSID • Remote Intelligent Perception Technology (RIPT) • Intelligent device recognition technology • Intelligent load balancing based on the number of STAs or traffic • STA limit: SSID-based STA limit, radio card-based STA limit • Bandwidth limit: STA/SSID/AP-based rate limit

FEATURES

Functionality	Description
	<ul style="list-style-type: none"> • PSK and Web authentication • Data encryption: WPA (TKIP), WPA-PSK, WPA2 (AES), WEP (64/128 bits), WPA3 • SMS authentication • MAB authentication • Data frame filtering: Whitelist, static blacklist, dynamic blacklist
Security Features	<ul style="list-style-type: none"> • User isolation • Rogue AP detection and containment • Dynamic ACL assignment • RADIUS • CPU Protect Policy (CPP) • Network Foundation Protection Policy (NFPP)
Routing Switching	<ul style="list-style-type: none"> • IPv4 address: Static IP address or dynamic IP address obtained via DHCP • Multicast: Multicast-to-unicast conversion
Management and Maintenance	<ul style="list-style-type: none"> • Supported wireless LAN controller: AC-224AP Wireless Controller • Network management: Telnet, TFTP, Web • Wireless positioning: RBIS • Wireless marketing: WMC/MCP • Fault detection and alarm • Information statistics and logs • When the AP works in fit mode, it can be switched to fat mode via an AC • When the AP works in fat mode, it can be switched to fit mode through the local control port or Telnet mode

Accessories

Screw x2

Screw Anchor x2

Mounting Bracket x1

Hidden Lock's Key x1

Ordering Information

ID	Description
149655	1167 Mbps 2x2 MU-MIMO Dual Radios Wireless Access Point
115392	1775 Mbps 2x2 MU-MIMO Dual Radios Gigabit Access Point
108705	2400 Mbps 2x2 MU-MIMO Dual Radios Gigabit Access Point
149657	2400 Mbps 2x2 MU-MIMO Dual Radios Gigabit Outdoor Access Point
149658	2400 Mbps 2x2 MU-MIMO Dual Radios Gigabit Outdoor Access Point
149656	3000 Mbps 2x2 MU-MIMO Dual Radios Gigabit Access Point
115391	3267 Mbps 2x2 MU-MIMO Three Radios Gigabit Access Point
115390	4134 Mbps 2x2 MU-MIMO Four Radios Gigabit Access Point
108707	6817 Mbps 4x4 MU-MIMO Three Radios Gigabit Access Point
115389	10 Gbps 4x4 MU-MIMO Three Radios Gigabit Access Point
141375	Wireless LAN Controller with 64 AP License
108708	Wireless LAN Controller with 224 AP License
149659	Wireless LAN Controller with 1152 AP License

Note: AC-1004/AC-7072 can manage all APs on the website, except three Wi-Fi 5 APs: FS-AP733C, FS-AP1167C, FS-AP3000C;
AC-224AP can manage all Wi-Fi 6 APs on the website, except three APs: AP-T565, AP-T567 and AP-N505.
