

Armored Patch Cables Datasheet

PERFECT SOLUTION FOR INSTALLS THAT REQUIRE EXTRA PROTECTION

Indoor Armored Fiber Patch Cables

The armored patch cables will allow you to protect your critical and essential fiber optic network with a crush-resistant and rodent-resistant jacket. The cable is a perfect solution for installing that require extra protection. The jacket contains steel armor and an aramid yarn strength member which allows the cable to remain extremely flexible while also being crush and rodent resistant.

Cable Structure

Armored fiber patch cables feature a specialized jacketing that increases the durability of fiber cables. In addition, the stainless steel tube allow optical fiber to be installed in the indoor harsh environments where a traditional fiber optic patch cable may fail, such as environments with excessive dust, or even damage-causing rodents etc.

* The cable structure is shown above for reference with single mode, and the multimode cable will only be different in jacket color.
