Provides a reliable foundation for mounting telecommunication and data center equipment.

45U GF2-Series 2-Post Open Frame Rack

The 2-post open frame rack is a high quality, cost-effective storage solution for patch panels and network switches. The small footprint makes GF2-Series rack the best choice in many telecommunications and equipment rooms, especially where floor space is limited. The black, textured powder coat finish makes it resistant to scratching while giving it a classic, attractive appearance.
