II. Inner Line Sequence

Utilizing the same external footprint as the existing traditional 12-fiber MT ferrule, the **MTP®-16** consists of a US Conec MT Elite ferrule with 16 fibers in single row, leveraging all the proven MT Elite ferrule technology in a higher-density format. A unique offset keying feature is designed into the connector to ensure proper mating without inadvertently connecting 16-fiber hardware with standard MPO-compliant hardware.
