

S5850 Series Switches

DESIGNED FOR ENTERPRISE, DATA CENTER, METRO AND HCI (HYPER-CONVERGED INFRASTRUCTURE) NETWORKS

Models: S5850-24T16S; S5850-24T16B

Overview

S5850 series switches are high performance routing switch with 24 10/100/1000 Base-T ports and 16 10G SFP+ / 25G SFP28 ports. The switches are designed to meet the requirements of next generation Enterprise, Data Center, Metro and HCI (Hyper-Converged Infrastructure) networks.

Based on FSOS software, the S5850 series supports the following features: IPv4/IPv6 protocol stack, multiple IPv4/IPv6 tunnel technique, data center DCB features (PFC/ECN/ETS), VXLAN, MLAG and hardware based OAM (802.1ag/Y.1731/CFM/EFM), etc.

Benefits

- Data Center DCB Features (PFC/ECN/ETS)
- IEEE802.1ag and ITU-T Y.1731 OAM
- MLAG (Multi-Chassis Link Aggregation)
- NVGRE/VXLAN/GENEVE
- LACP/ECMP/VRRP/VARP/Smart Link/BFD/ERPS/G.8031/G.8032
- IGMP Snooping, IGMP v1/v2/v3, PIM-SM
- ACL Based on IPv4/IPv6/MAC

Key Features

Intelligent Ethernet OAM

With the IEEE802.1ag and ITU-T Y.1731 end-to-end OAM, Ethernet service providers can monitor the services, survey the end-to end performance and ensure the service quality match the agreement. The fault management technique includes CCM, LTM and LBM. Performance targets include measure for latency and jitter.

Support remote management, network monitoring, network fault indication, remote loopback and MIB parameter retrieval according to the standard 802.3ah EFM.

Data Center Features

Support 1+1 load-sharing AC power supplies and 3+1 redundant variable-speed fans as standard features, protecting the switch from a single power supply or fan failure. DC power options are also available.

Support leading edge Data Center features: Priority Flow Control (PFC), explicit Congestion Notification (ECN) and Data Center TCP, etc.

Support MLAG (Multi-Chassis Link Aggregation) to aggregate links across different devices. MLAG can build an Active-Active system to improve the reliability of the network links from single board grade to device grade. Support overlay technology (include NVGRE/VXLAN/GENEVE, etc.). Overlay can make layer 2 packets across the layer 3 networks by using NVGRE/VXLAN/GENEVE header to encapsulate the entire ethernet packets. Overlay resolves the problem of MAC table size limitation in traditional layer 2 networks, resolves the problem of VLAN id count limitation, and resolves the problem network dynamic adjustment which cannot achieve by VLAN/VPN. Support RPC-API.

High Reliability

Support real-time environment monitoring technology to detect the chipset temperature, status of fan and power, etc.

Support LACP/ECMP/VRRP/VARP/STP/RSTP/MSTP/Smart Link/BFD/ERPS/G.8031/G.8032/Load-Balancing, etc. to protect the network traffic all-around effectively.

Support patented technology "Sysmon" for CPU status monitoring can take action when system is error.

Outstanding QoS Control

Provide 10 hardware queues per-port (8 unicast queues, 1 multicast queues, and 1 monitor queue).

Support multi-stage scheduling technology such as WDRR (Weighted Deficit Round Robin)/SP (Strict Priority) and TD (Tail Drop)/ WRED (Weighted Random Early Detection) to prevent congestion.

Support flexible queue scheduling mechanism to do the shaping for queue or port traffic.

Support ingress and egress policer for intelligent bandwidth monitoring.

Support srTCM (Single Rate Three Color Marker) and trTCM (Two Rate Three Color Marker)

Triple-play Service Support

Offer high bandwidth for Triple-Play services such as IPTV, video monitoring. The built-in QoS capabilities and flexible queuing technologies guarantee high quality of services.

Support rich multicast protocol set (IGMP Snooping, IGMP v1/v2/v3, PIM-SM).

Key Features

Support up to 2K multicast groups and 4K logical replications per group.

Support IPTV service and multicast latency control.

Comprehensive Network Security Policy

Support subscriber-class/switch-class/network-class security control.

The ACL based on IPv4/IPv6/MAC can filter IPv4/IPv6/Non-IP packet respectively. Besides that, extended IPv4/IPv6 ACL which can match Layer 2/Layer 3/Layer 4 information in one rule is available. The ACLs can apply to physical ports/vlan/port group/vlan group. The members of port group or vlan group share a set of ACLs and save the TCAM resource.

ARP Inspection and IP Source Guard features prevent network from malicious ARP attack.

Support CPU Traffic Protection, Storm Control and CPU load optimization features.

Support centralized 802.1x authentication feature to forbidden illegal user accessing network.

Convenient Management Features

Support varied management interfaces, including console port/inband network ports/outband network port/USB port.

Support CLI (Command Line Interface), web management, Telnet and FTP connection.

Support SNMPv1/v2/v3, SSH2.0, SSL and OAM.

Technical Specification

S5850 series switches come with advanced hardware architecture design and abundant L2 and L3 features. Here's a look at the details.

CHARACTERISTICS

	S5850-24T16S	S5850-24T16B
Ports	24x 10/100/1000BASE-T RJ45, 16x 10G SFP+	24x 10/100/1000BASE-T RJ45, 16x 25G SFP28
Max. 25G Ports	-	16
Max. 10G Ports	16	16
Max. 1G Ports	40	40
Console port	1	1
Ethernet Management Port	1	1
USB Port	1	1

Operating System

CHARACTERISTICS

	S5850-24T16S	S5850-24T16B
OS	FSOS	FSOS
Key Components		
CPU	NXP LS1023A (A53 CPU/Dual core)	NXP LS1023A (A53 CPU/Dual core)
Performance		
Layer Type	Layer 3	Layer 3
Switching Capacity	368 Gbps	848 Gbps
Forwarding Rate	273.7 Mpps	630.9 Mpps
Max./Min. Latency	0.725μs/0.64μs	0.645μs/0.57μs
DDRIII Capacity	1GB	1GB
Flash Memory	4GB (eMMC)	4GB (eMMC)
System Memory	1GB DDR4	1GB DDR4
RAM	1GB	1GB
Packet Buffer	4MB	4MB
Jumbo Frame	9.6KB	9.6KB
MLAG	Support	Support
MAC Address	49K	49K
Number of VLANs	4K	4K
MTBF (Hours)	216431.48	216431.48
Authentication Methods	AAA, Dot1X (802.1X)	AAA, Dot1X (802.1X)
Remote Management Protocol	SNMP, RMON, HTTP, Telnet, SSH	SNMP, RMON, HTTP, Telnet, SSH
Status Indicators	Location, SYS, PWR, MGMT, Interface	Location, SYS, PWR, MGMT, Interface

CHARACTERISTICS

	S5850-24T16S	S5850-24T16B
Power		
Input Voltage	100-240VAC, 50-60Hz	100-240VAC, 50-60Hz
Typical Power Consumption	55W	55W
Max. Power Consumption	70W	70W
Physical and Environmental		
Dimensions (H x W x D)	1.72" x 17.32" x 13.78" (43.6 x 440 x 350mm)	1.72" x 17.32" x 13.78" (43.6 x 440 x 350mm)
Rack Space	1U	1U
Hot-swappable Power Supplies	2 (1+1 Redundancy)	2 (1+1 Redundancy)
Hot-swappable Fans	3 +1 Redundancy	3 +1 Redundancy
Airflow	Front-to-Back	Front-to-Back
Acoustic Noise	81.4dB	50dB
Operating Temperature	32°F to 113°F (0 to 45 °C)	32°F to 113°F (0 to 45 °C)
Storage Temperature	-40°F to 158°F (-40 to 70 °C)	-40°F to 158°F (-40 to 70 °C)
Operating Humidity	10 to 90% (Non-condensing)	10 to 90% (Non-condensing)
Storage Humidity	0 to 95% (Non-condensing)	0 to 95% (Non-condensing)
Weight	13 lbs (5.8kg)	13 lbs (5.8kg)
Warranty		
Warranty	5 Years	5 Years

FEATURES

Functionality	Description
Ethernet Features	<ul style="list-style-type: none"> • Support full duplex, half duplex, and auto-negotiation duplex • Support auto-negotiation port speed • Support Jumbo Frame • Support Flow Control • Support Storm Control • Support Port-block • Support Port-isolate • Support L2 Protocol Tunneling
VLAN	<ul style="list-style-type: none"> • Support 4094 VLANs • Support VLAN access mode: Access /Trunk • Support Default VLAN • Support VLAN Classification • Support basic QinQ, selective QinQ and VLAN Mapping • Support VLAN statistics • Support Private VLAN • Support Guest VLAN • Support Voice VLAN
MAC Address Table	<ul style="list-style-type: none"> • Support static MAC address • Support dynamic MAC address learning and aging • Support hardware learning • Support black hole MAC address • Support MAC Flapping detect
Link Aggregation	<ul style="list-style-type: none"> • Support Static Link aggregation • Support LACP • Number of link aggregation groups (LAGs) supported: 64 • Maximum number of ports per LAG: 1024 • Support Static load balancing • Support dynamic load balancing (DLB) • Support Self-healing

KEY FEATURES

Functionality	Description
Reliability Features	<ul style="list-style-type: none"> • Support STP/RSTP/MSTP protocol • Support STP Protocol Protection (BPDU Filter/Guard, Root Guard, Loop Guard, Anti TC-BPDU attack) • Support Single ERPS ring / tangent ERPS rings / intersecting ERPS rings • Support ERPS compatible with RRPP • Support G.8031 • Support G.8032 • Support port Loopback Detect • Support BFD • Support VRRP • Support MLAG • Support ethernet OAM: EFM/CFM/Y.1731 • Support Software class process monitoring(Sysmon) • Support Hardware Watch Dog
ARP Features	<ul style="list-style-type: none"> • Support static ARP • Support dynamic ARP leaning and aging • Support Gratuitous ARP • Support basic ARP-Proxy and local ARP-Proxy
IPv4 Forwarding	<ul style="list-style-type: none"> • Support IPv4 static routes • Support IPv4 static routes co-work with IP SLA • Support VRF • Support uRPF check
IPv4 Forwarding	<ul style="list-style-type: none"> • Support RIPv1, RIPv2 • Support OSPFv2 • Support IS-IS • Support BGP • Support Route-map and Prefix list • Support Policy-based Routing (PBR) • Support ICMP redirect, Support ICMP unreachable • Support ECMP

KEY FEATURES

Functionality	Description
IPv6 Forwarding	<ul style="list-style-type: none"> • Support ICMPv6 • Support NDP • Support PMTU • Support IPv6 static routes • Support IPv6 black hole routes • Support RIPng • Support OSPFv3 • Support IPv6 over IPv4 Tunnel • Support 6to4 Tunnel • Support ISTAP Tunnel • Support DHCPv6 • Support IPv6 prefix list • Support IS-IS
Multicast Features	<ul style="list-style-type: none"> • Support IGMP v1/v2/v3 • Support IGMP agent • Support IGMP SSM Mapping • Support PIM-SM,PIM-SSM,PIM-DM • Support MLD v1/v2, MLD v1/v2 snooping • Support MVR and MVR6 • Support PIM-SM v6
Data Center Features	<ul style="list-style-type: none"> • Support VARP • Support VXLAN • Support GRE Tunnel • Support NVGRE Tunnel • Support GENEVE Tunnel • Support DCBX • Support priority-based flow control (PFC) • Support PFC Deadlock detection • Support EVPN

KEY FEATURES

Functionality	Description
QoS Features	<ul style="list-style-type: none"> • Support traffic classification based on COS/DSCP (simple classification) • Support traffic classification based on ACL (complex classification) • Support queue scheduling based on traffic classification • Support Remark the priority fields(COS/DSCP) of the packet • Support flow redirection • Support flow mirror • Support traffic policing • Support traffic shaping • Support traffic statistics • Support SP(Strict Priority) scheduling • Support WDRR (Weighted Deficit Round Robin) scheduling • Support SP + WDRR mixed scheduling • Support TD(Tail Drop) • Support WRED (Weighted Random Early Detection) • Support ECN tags based on TD and WRED
Security Features	<ul style="list-style-type: none"> • Support SSH • Support Radius • Support TACAS+ • Support AAA • Support port based dot1x and MAC based dot1x • Support configure dot1x Guest via command or Radius server • Support access control list(ACL) • Support traffic classification based on source and destination IP / source and destination MAC / source and destination layer for protocol num / VLAN ID • Support ACL matching User defined fields (UDF) • Support ACL active based on Time-Range • Support ARP inspection • Support IP source guard • Support port security to limit the MAC address learning on interface • Support VLAN security to limit the MAC address learning on interface • Support CoPP (Control Plane Protect) black & white list and rate limit features • Support CPU Traffic Limit • Support Prevent DDOS attack • Support ACL filtering Telnet/SSH login • Support 802.1AE (MacSec) • Support Link-Flapping detection

KEY FEATURES

Functionality	Description
MPLS Features	<ul style="list-style-type: none"> • Support MPLS Forwarding • Support VPWS • Support VPLS • Support MPLS OAM • Support MPLS Stats • Support L3VPN • Support MPLS ACL • Support MPLS QoS
Configuration and Maintenance	<ul style="list-style-type: none"> • Support DHCP Server • Support DHCP Relay • Support DHCP Snooping • Support DHCP Client • Support DHCP Option82 • Support RMON • Support sFlow • Support IP SLA • Support IPFIX and MFP • Support SGT • Support Latency/Buffer Monitor • Support EFD (Elephant Flow Detection) • Support NTP • Support port Errdisable state detection and recovery • Support configure static DNS client • Support LLDP • Support port loopback • Support hardware loopback (internal/external) • Support to configure system time • Support to configure time zone
Debugging Features	<ul style="list-style-type: none"> • Support to Debug based on modules • Support CPU/memory usage display and alarm • Support Device temperature/PSU/FAN/status display and alarm • Support user operation logs • Support Management of logs, alarms, and debugging information • Support VCT (Virtual Cable Test) • Support detailed diagnostic-information collection • Support reboot information logging • Support network diagnostics (ping/traceroute) • Support mirror: support use port/vlan/cpu as mirror source • Support use port/port group/vlan/cpu as mirrordestination

KEY FEATURES

Functionality	Description
Debugging Features	<ul style="list-style-type: none"> • Support ERSPAN • Support to CPU/From CPU packets statistics • Support L2 ping • Support UDLD(Unidirectional Link Detection)
Management Features	<ul style="list-style-type: none"> • Support inband and outband management ports • Support privileged user priority and privileged commands • Support Network management based on SNMPv1/v2c/v3 • Support Public and private MIB • Support Public and private Trap • Support Configuration and management based on WEB UI • Support Configuration and management based on RPC-API • Support SmartConfig(Automatically configuration when system start) • Support OVSDB • Support change the system specifications by choose different STM Profiles • Support feature configuration based on License • Support restore factory default configuration • Support manual/schedule reboot • Support upgrade with the local image file/remote TFTP server • Support online upgrade Uboot
File System	<ul style="list-style-type: none"> • Support file system to manage the files and directories • Support upload/download files via FTP/TFTP • Support transmit files via Xmodem
