

FTTH Cable

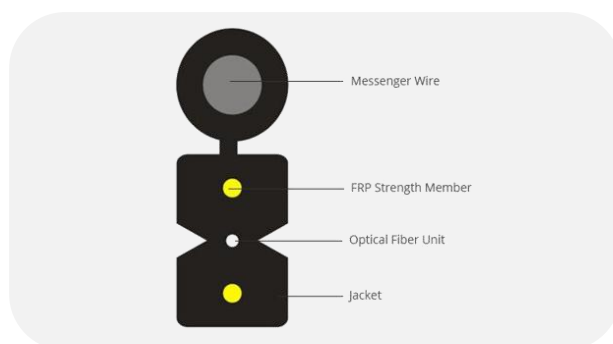

Self-supporting Flat Drop Cable GJYXFCH

Self-supporting FTTH drop cable is constructed with one or two single-mode fiber (G.657A). The cable is protected by a dielectric strength member made of fiberglass reinforced plastic (FRP), steel wire and a LSZH outer jacket. Designed for outdoor installation, the cable is well suited for connections between the dome closure and small dwelling unit/warehouse and independent villas.

FRP Strength Member GJYXFCH

Inner Structure GJYXFCH

Features and Benefits

- Self-supporting structure, light weight, easy to install
- Durable and flame retardant LSZH sheath, low smoke zero halogen
- Excellent mechanical and environmental performance
- Steel wire as additional strength member has high tensile strength
- Two parallel FRP strength members ensure good performance of anti- electromagnetic and crush resistance

Application

- Outdoor aerial application
- Used in the FTTH projects
- High performance optical network operation
- High speed optical routes in building
