Vertical Cable Managers with Finger Ducts Datasheet

Meet greater demands on the physical infrastructure to help manage growing cable densities and larger network equipment.

Vertical Cable Managers with Finger Ducts

These vertical cable managers with finger ducts meet the needs to maximize space utilization to reduce the capital expenditures while maintaining network reliability and availability. Vertical cable manager cost-effectively organizes, manages and protects cables on the front and rear of the rack or cabinet. Plus, bend radius control helps guard against kinks and snags.

Standards Compliance

• RoHS Compliant

• ISO9001 Certificate

Features

• Maintains bend radius as cables transition.

• Allows easy access to cables for moves, adds and changes.

• Increases the longevity of server and networking equipment interfaces by providing cable strain relief.

• Made of ABS material, solid and durable.

45U Vertical Cable Managers with Finger Duct

45U vertical cable managers are designed to manage networking equipment in half the area required by traditional cable management systems. Molded cable management fingers, with integral bend radius control, combine with angled patch panels to eliminate the need for horizontal cable managers.

5U 3" Wide Vertical Cable Managers with Finger Duct

5U 3" wide plastic vertical cable managers are light in weight, this type of bracket can be installed in specific areas of the rack, rather than along its entire height. Moreover, it can be stacked to reach any height(U), so it can be an alternative of higher vertical cable management.
