5.5 mvr type........................................................................................................................66
5.6 show mvr......................................................................................................................67
5.7 show mvr interface........................................................................................................67
5.8 show mvr group.............................................................................................................68
5.9 show mvr group static...................................................................................................68
5.10 show resource mvr......................................................................................................69
1 IP Multicast-Routing Commands

1.1 ip multicast-routing

Use this command to enable ip multicast routing.
To disable ip multicast routing, use the no form of this command.

Command Syntax

```
ip multicast-routing
no ip multicast-routing
```

Command Mode

Global Configuration

Default

Enable

Usage

None

Examples

- This example shows how to enable ip multicast routing.
  Switch# configure terminal
  Switch(config)# ip multicast-routing
- This example shows how to disable ip multicast routing.
  Switch# configure terminal
  Switch(config)# no ip multicast-routing

Related Commands

None

1.2 ip multicast route-limit

Use this command to set the maximum number of the multicast routes.
To return it to default value, use the no form of this command.

Command Syntax

```
ip multicast route-limit route-number (threshold-number)
no ip multicast route-limit
```

<table>
<thead>
<tr>
<th><strong>route-number</strong></th>
<th>Max number of multicast route entries</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>threshold-number</strong></td>
<td>Threshold at which to generate warning message</td>
</tr>
</tbody>
</table>

**Command Mode**
Global Configuration

**Default**
Default maximum number of the multicast routes should be 2048.
Default threshold should be same as the maximum number of multicast routes.

**Usage**
None

**Examples**
- This example shows how to set the maximum number of the multicast routes to 512.
  
  Switch(config)# ip multicast route-limit 512
- This example shows how to return the maximum number of the multicast routes to default value.
  
  Switch(config)# no ip multicast route-limit

**Related Commands**
- `show ip mroute route-limit`

### 1.3 ip mroute-rpf

Use this command to configure static multicast routes.
To remove static multicast routers, use the no form of this command.

**Command Syntax**

```
ip mroute-rpf source-address/mask-length (static | rip | ospf | ) rpf-nbr-address distance
no ip mroute-rpf source-address/mask-length (static | rip | ospf | )
```

<table>
<thead>
<tr>
<th><strong>source-address</strong></th>
<th>Destination address</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>mask-length</strong></td>
<td>Length of address mask</td>
</tr>
<tr>
<td><strong>static</strong></td>
<td>Static routes</td>
</tr>
<tr>
<td><strong>rip</strong></td>
<td>Routing Information Protocol</td>
</tr>
<tr>
<td><strong>ospf</strong></td>
<td>Open Shortest Path First</td>
</tr>
<tr>
<td><strong>rpf-nbr-address</strong></td>
<td>RPF neighbor address or route</td>
</tr>
<tr>
<td><strong>distance</strong></td>
<td>Administrative distance for mroute</td>
</tr>
</tbody>
</table>

**Command Mode**
Global Configuration

**Default**
No static multicast route is configured by default.

**Usage**
None
Examples

- This example shows how to set multicast source 10.10.1.1/24 RPF neighbor address as 192.168.1.1.
  
  Switch(config)# ip mroute-rpf 10.10.1.1/24 192.168.1.1

- This example shows how to remove this multicast static route.
  
  Switch(config)# no ip mroute-rpf 10.10.1.1/24

Related Commands

show ip mroute-rpf

1.4 show ip mroute

Use this command to display the ip multicast routing table information.

Command Syntax

show ip mroute (sparse|) (count|summary|)
show ip mroute address (sparse|) (count|summary|)
show ip mroute route-limit

<table>
<thead>
<tr>
<th>Syntax</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>sparse</td>
<td>Show sparse multicast routes</td>
</tr>
<tr>
<td>count</td>
<td>Show number of multicast route entries</td>
</tr>
<tr>
<td>summary</td>
<td>Show abbreviated multicast route information</td>
</tr>
<tr>
<td>address</td>
<td>Show specify source or group address multicast route</td>
</tr>
<tr>
<td>route-limit</td>
<td>Show max route limit value</td>
</tr>
</tbody>
</table>

Command Mode

Privileged EXEC

Default

None

Usage

None

Examples

- This example shows how to display multicast routing table.
  
  Switch# show ip mroute

  IP Multicast Routing Table
  Flags: I - Immediate Stat, T - Timed Stat, F - Forwarder installed
  Timers: Uptime/Stat Expiry
  Interface State: Interface (TTL)

  (10.0.1.20, 228.1.1.1), uptime 00:35:46, stat expires 00:02:19
  Owner PIM-SM, Flags: TF
  Incoming interface: eth-0-1
  Outgoing interface list:
    eth-0-2 (1)

- This example shows how to display multicast routing table summary information.
Switch# show ip mroute summary

IP Multicast Routing Table
Flags: I - Immediate Stat, T - Timed Stat, F - Forwarder installed
Timers: Uptime/Stat Expiry
Interface State: Interface (TTL)

(10.0.1.20, 228.1.1.1), 00:36:59/00:02:46, PIM-SM, Flags: TF

Related Commands
ip multicast route-limit
ip mroute-rpf

1.5 show ip mvif

Use this command to display the multicast interface information.

Command Syntax
show ip mvif(INTERFACE)

<table>
<thead>
<tr>
<th>INTERFACE</th>
<th>Interface name. eg : eth-0-1</th>
</tr>
</thead>
</table>

Command Mode
Privileged EXEC

Default
None

Usage
None

Examples
This example shows how to display multicast interface information.

Switch# show ip mvif

<table>
<thead>
<tr>
<th>Interface</th>
<th>Vif</th>
<th>Owner</th>
<th>TTL</th>
<th>Local</th>
<th>Remote</th>
<th>Uptime</th>
</tr>
</thead>
<tbody>
<tr>
<td>eth-0-1</td>
<td>0</td>
<td>PIM-SM</td>
<td>1</td>
<td>10.0.1.1</td>
<td>0.0.0.0</td>
<td>00:42:56</td>
</tr>
<tr>
<td>eth-0-2</td>
<td>2</td>
<td>PIM-SM</td>
<td>1</td>
<td>10.0.2.1</td>
<td>0.0.0.0</td>
<td>00:42:53</td>
</tr>
</tbody>
</table>

Related Commands
ip pim sparse-mode

1.6 show ip multicast groups count

Use this command to display the multicast group count.

Command Syntax
show ip multicast groups count

Command Mode
Privileged EXEC
This example shows how to display multicast group number.

Switch# show ip multicast groups count

| multicast group record count: 1 |
| multicast source record count: 0 |
| multicast total record count: 1 |
| multicast max record count: 2048 |

Related Commands
None

1.7 show ip mroute-rpf

Use this command to display RPF information for multicast source.

Command Syntax

```
show ip mroute-rpf source-address
```

| source-address | The source address of mroute-rpf |

Command Mode
Privileged EXEC

Default
None

Usage
None

Examples
This example shows how to display multicast source 192.168.1.1 RPF neighbor.

Switch# show ip mroute-rpf 192.168.1.1

<table>
<thead>
<tr>
<th>RPF information for 192.168.1.1</th>
</tr>
</thead>
<tbody>
<tr>
<td>RPF interface: eth-0-10</td>
</tr>
<tr>
<td>RPF neighbor: 0.0.0.0</td>
</tr>
<tr>
<td>RPF route: 192.168.1.0/24</td>
</tr>
<tr>
<td>RPF type: unicast (connected)</td>
</tr>
<tr>
<td>RPF recursion count: 0</td>
</tr>
<tr>
<td>Doing distance-preferred lookups across tables</td>
</tr>
<tr>
<td>Distance: 0</td>
</tr>
<tr>
<td>Metric: 0</td>
</tr>
</tbody>
</table>

Related Commands
ip mroute-rpf
1.8  **show resource mcast**

Use this command to display multicast resource information.

**Command Syntax**

```
show resource mcast
```

**Command Mode**

Privileged EXEC

**Default**

None

**Usage**

None

**Examples**

This example shows how to display multicast resource information.

Switch# show resource mcast

<table>
<thead>
<tr>
<th>MCAST Resource</th>
<th>Used</th>
<th>Capability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mcast Entry</td>
<td>1</td>
<td>508</td>
</tr>
<tr>
<td>Mcast Member</td>
<td>1</td>
<td>4064</td>
</tr>
</tbody>
</table>

**Related Commands**

None

1.9  **clear ip mroute**

Use this command to clear the multicast routing table information.

**Command Syntax**

```
clear ip mroute (* | group-address (source-address))
```

<table>
<thead>
<tr>
<th>group-address</th>
<th>Clear specify group address multicast route</th>
</tr>
</thead>
<tbody>
<tr>
<td>source-address</td>
<td>Clear specify source address multicast route</td>
</tr>
<tr>
<td>*</td>
<td>Clear all multicast routes</td>
</tr>
</tbody>
</table>

**Command Mode**

Privileged EXEC

**Default**

None

**Usage**

None
Examples

This example shows how to clear all multicast routing table information.
Switch# clear ip mroute *

Related Commands

show ip mroute
2.1 *ip igmp access-group*

Use this command to apply an access-list to the igmp interface.
To remove this setting, use the no form of this command.

**Command Syntax**

```
ip igmp access-group list
no ip igmp access-group
```

| list | The name of the ip access-list to be applied. The format of access-list should be ipv4. |

**Command Mode**

Interface configuration

**Default**

Access-group is not configured on any igmp interface by default.

**Usage**

No matter the source ip or the destination ip in ACE should be take effect respectively. If ACE's action is denied, then the packet should be ignored; otherwise, if it matches one whose action is permit, then it should be processed regularly.

**Examples**

- This example shows how to apply the access-list acl1 to the interface vlan1.
  Switch(config-if)# interface vlan1
  Switch(config-if)# ip igmp access-group acl1
- This example shows how to remove the access-list acl1 on the interface.
  Switch(config-if)# no ip igmp access-group

**Related Commands**

`show ip igmp interface`

2.2 *ip igmp immediate-leave group-list*

Use this command to apply an access-list to configure which groups support immediately-leave per interface.
To remove this setting, use the no form of this command.
Command Syntax

```
ip igmp immediate-leave group-list list
no ip igmp immediate-leave
```

| list | The name of the ip access-list to be applied. The format of access-list should be ipv4. |

Command Mode

Interface configuration

Default

Access-group is not configured on any igmp interface by default.

Usage

No matter the source ip or the destination ip in ACE should be take effect respectively. If ACE's action is denied, then the packet should be ignored; Otherwise if it matches one whose action is permit, then it should be processed regularly.

Examples

- This example shows how to apply an access-list to configure which groups support immediately-leave on interface vlan1.
  ```
  Switch(config-if)# interface vlan 1
  Switch(config-if)# ip igmp immediate-leave group-list acl1
  ```
- This example shows how to remove the access-list acl1 on the interface.
  ```
  Switch(config-if)# no ip igmp immediate-leave group-list
  ```

Related Commands

- `show ip igmp interface`

### 2.3 ip igmp last-member-query-count

Use this command to set the value of last member query count. To return it to default value, use the no form of this command.

Command Syntax

```
ip igmp last-member-query-count count
no ip igmp last-member-query-count
```

| count | The value of last member query count, range is 2 to 7 |

Command Mode

Interface Configuration

Default

2
Usage

None

Examples

- This example shows how to set the value of last member query count to 5.
  Switch(config-if)# ip igmp last-member-query-count 5
- This example shows how to return the value of last member query count to default value.
  Switch(config-if)# no ip igmp last-member-query-count

Related Commands

show ip igmp interface
ip igmp last-member-query-count

2.4 ip igmp last-member-query-interval

Use this command to set the value of last member query interval. To return it to default value, use the no form of this command.

Command Syntax

ip igmp last-member-query-interval interval
going
no ip igmp last-member-query-interval

| interval | The last member query interval value(ms), range is 1000 to 25500.

Command Mode

Interface configuration

Default

1000

Usage

None

Examples

- This example shows how to set the last member query interval value to 10000ms.
  Switch(config-if)# ip igmp last-member-query-interval 10000
- This example shows how to return the last member query interval value to default value.
  Switch(config-if)# no ip igmp last-member-query-interval

Related Commands

show ip igmp interface
ip igmp last-member-query-count

2.5 ip igmp limit

Use this command to set the max num of groups allowed.
To return it to default value, use the no form of this command.

**Command Syntax**

```
ip igmp limit number except list
no ip igmp limit
```

<table>
<thead>
<tr>
<th><code>number</code></th>
<th>The max num of groups, range is 1 to 8192</th>
</tr>
</thead>
<tbody>
<tr>
<td><code>list</code></td>
<td>Groups not to be counted</td>
</tr>
</tbody>
</table>

**Command Mode**

Global Configuration & Interface Configuration

**Default**

8192

**Usage**

None

**Examples**

- This example shows how to set the max num of groups allowed to 1000 globally.
  
  ```
  Switch(config)# ip igmp limit 1000
  ```

- This example shows how to return the max num of groups to default value.

  ```
  Switch(config)# no ip igmp limit
  ```

**Related Commands**

`show ip igmp interface`

### 2.6 ip igmp mroute-proxy

Use this command to set the mroute-proxy port on this interface.
To remove it, use the no form of this command.

**Command Syntax**

```
ip igmp mroute-proxy IFNAME
no ip igmp mroute-proxy IFNAME
```

| `IFNAME` | The interface name of the mroute-proxy port |

**Command Mode**

Interface configuration

**Default**

None

**Usage**

This command is used to set the mroute-proxy port on the interface. Only one mroute-proxy port can be set on the interface. When set it again, the new setting will overwrite the old one.
Examples

- This example shows how to set the mroute-proxy port to eth-0-1 on this interface.
  Switch(config-if)# ip mroute-proxy eth-0-1
- This example shows how to remove the mroute-proxy port on this interface.
  Switch(config-if)# no ip mroute-proxy

Related Commands

ip igmp proxy-service

2.7 ip igmp proxy-service

Use this command to enable igmp mroute proxy service on the interface.
To disable it, use the no form of this command.

Command Syntax

  ip igmp proxy-service
  no ip igmp proxy-service

Command Mode

Interface configuration

Default

None

Usage

This command is used with command ip igmp mroute-proxy and to set the upstream interface of the igmp group.

Examples

- This example shows how to enable igmp mroute proxy service on this interface.
  Switch(config-if)# ip igmp proxy-service
- This example shows how to disable igmp mroute proxy service.
  Switch(config-if)# no ip igmp proxy-service

Related Commands

ip igmp mroute-proxy

2.8 ip igmp querier-timeout

Use this command to set the igmp previous querier timeout value.
To return it to default value, use the no form of this command.

Command Syntax

  ip igmp querier-timeout intval
  no ip igmp querier-timeout

| intval | The igmp previous querier timeout value, range is 60 to 300s. |
**Command Mode**

Interface configuration

**Default**

255 seconds

**Usage**

None

**Examples**

- This example shows how to set the igmp previous querier timeout value to 100 seconds.
  ```
  Switch(config-if)# ip igmp querier-timeout 100
  ```
- This example shows how to return the igmp previous querier timeout value to default value.
  ```
  Switch(config-if)# no ip igmp querier-timeout
  ```

**Related Commands**

- ip igmp query-interval
- ip igmp query-max-response-time

### 2.9 ip igmp query-interval

Use this command to set the igmp query interval.

To return it to default value, use the no form of this command.

**Command Syntax**

```
ip igmp query-interval intval
no ip igmp query-interval
```

<table>
<thead>
<tr>
<th><code>intval</code></th>
<th>The value of igmp query interval, range is 2 to 18000s.</th>
</tr>
</thead>
</table>

**Command Mode**

Interface configuration

**Default**

125 seconds

**Usage**

None

**Examples**

- This example shows how to set the igmp query interval to 300 seconds.
  ```
  Switch(config-if)# ip igmp query-interval 300
  ```
- This example shows how to return the igmp query interval to default value.
  ```
  Switch(config-if)# no ip igmp query-interval
  ```

**Related Commands**

- ip igmp querier-timeout
2.10 **ip igmp query-max-response-time**

Use this command to set the igmp query max response time. To return it to default value, use the no form of this command.

**Command Syntax**

```
ip igmp query-max-response-time intval
no ip query-max-response-time
```

| **intval** | The igmp query max response time, range is 1 to 25s. |

**Command Mode**

Interface configuration

**Default**

10 seconds

**Usage**

Query max response time must be less than igmp query interval.

**Examples**

This example shows how to set the igmp query max response time to 20 seconds.

```
Switch(config-if)# ip igmp query-max-response-time 20
```

This example shows how to return the igmp query max response time to default value.

```
Switch(config-if)# no ip igmp query-max-response-time
```

**Related Commands**

- `ip igmp querier-timeout`
- `ip igmp query-interval`

2.11 **ip igmp robustness-variable**

Use this command to set the igmp querier robustness variable value. To return it to default value, use the no form of this command.

**Command Syntax**

```
ip igmp robustness-variable value
no ip robustness-variable
```

| **value** | The igmp querier robustness variable value, range is 2 to 7. |

**Command Mode**

Interface configuration
Default
2

Usage
None

Examples
- This example shows how to set the igmp querier robustness variable value to 6.
  Switch(config-if)# ip igmp robustness-variable 5
- This example shows how to return the igmp querier robustness variable value to default value.
  Switch(config-if)# no ip igmp robustness-variable

Related Commands
  show ip igmp interface

2.12 ip igmp version
Use this command to set the igmp version on interface.
To return it to default value, use the no form of this command.

Command Syntax
ip igmp version number
no ip version

<table>
<thead>
<tr>
<th>value</th>
<th>The igmp version on the interface, range is 1 to 3</th>
</tr>
</thead>
</table>

Command Mode
Interface configuration

Default
2

Usage
None

Examples
- This example shows how to set the igmp version 1 on the interface.
  Switch(config-if)# ip igmp version 1
- This example shows how to return the igmp version to default value.
  Switch(config-if)# no ip igmp version

Related Commands
  show ip igmp interface

2.13 ip igmp static-group
Use this command to configure the static multicast group on interface.
To delete static group, use the no form of this command.
Command Syntax

```
ip igmp static-group group-address ( source source-address )
no ip igmp static-group group-address ( source source-address )
```

<table>
<thead>
<tr>
<th>Group-address</th>
<th>The multicast group address</th>
</tr>
</thead>
<tbody>
<tr>
<td>Source Address</td>
<td>The multicast source address</td>
</tr>
</tbody>
</table>

Command Mode
Interface configuration

Default
None

Usage
None

Examples
- This example shows how to configure the static IGMP group on interface.
  Switch # configure terminal
  Switch (config)# interface eth-0-1
  Switch (config-if)# ip igmp static-group 226.1.2.3
  Switch (config-if)# ip igmp static-group 226.1.2.4 source 1.2.3.4
- This example shows how to delete static igmp group on interface.
  Switch # configure terminal
  Switch (config)# interface eth-0-1
  Switch (config-if)# no ip igmp static-group 226.1.2.3

Related Commands
show ip igmp groups

2.14  ip igmp ssm-map enable

Use this command to enable igmp ssm mapping.
To disable ssm mapping, use the no form of this command.

Command Syntax
```
ip igmp ssm-map enable
no ip igmp ssm-map enable
```

Command Mode
Global Configuration

Default
Disable

Usage
None
Examples

- This example shows how to enable igmp ssm mapping.
  Switch(config)# ip igmp ssm-map enable
- This example shows how to disable igmp ssm mapping.
  Switch(config)# no ip igmp ssm-map enable

Related Commands

None

2.15 **ip igmp ssm-map static**

Use this command to set igmp ssm mapping.
To cancel ssm mapping setting, use the no form of this command.

Command Syntax

```
ip igmp ssm-map static list source-address
no ip igmp ssm-map static list source-address
```

<table>
<thead>
<tr>
<th>Command</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>list</td>
<td>Specify multicast group address range access list</td>
</tr>
<tr>
<td>source-address</td>
<td>Multicast source address</td>
</tr>
</tbody>
</table>

Command Mode

Global Configuration

Default

Disable

Usage

None

Examples

- This example shows how to set igmp ssm mapping.
  Switch(config)# ip igmp ssm-map static ipacl 192.168.1.1
- This example shows how to unset igmp ssm mapping.
  Switch(config)# no ip igmp ssm-map static ipacl 192.168.1.1

Related Commands

None

2.16 **clear ip igmp**

Use this command to clear igmp groups.

Command Syntax

```
clear ip igmp (* | group group-address |)
```

<table>
<thead>
<tr>
<th>Command</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>group</td>
<td>Specify multicast group address</td>
</tr>
</tbody>
</table>

### clear ip igmp groups

Use this command to clear IGMP groups on specified interface.

#### Command Syntax

```
clear ip igmp (group group-address | interface) IFNAME
```

| **group**
| group-address | Specify multicast group address |
| **interface** | Specify interface |
| **IFNAME** | Interface name |

#### Command Mode

Privileged EXEC

#### Default

None

#### Usage

None

#### Examples

This example shows how to clear IGMP group on specified interface.
```
Switch# clear ip igmp interface eth-0-1
```

### Related Commands

- `show ip igmp groups`
2.18 **show ip igmp groups**

Use this command to show the information about igmp groups.

**Command Syntax**

```
show ip igmp groups group-address [detail]
```

<table>
<thead>
<tr>
<th>group-address</th>
<th>Specify multicast group address</th>
</tr>
</thead>
<tbody>
<tr>
<td>detail</td>
<td>Detailed Information</td>
</tr>
</tbody>
</table>

**Command Mode**

Privileged EXEC

**Default**

None

**Usage**

None

**Examples**

This example shows how to display the detail information about igmp groups.

Switch# show ip igmp groups detail

<table>
<thead>
<tr>
<th>Interface:</th>
<th>eth-0-1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Group:</td>
<td>227.0.0.1</td>
</tr>
<tr>
<td>Uptime:</td>
<td>00:00:33</td>
</tr>
<tr>
<td>Group mode:</td>
<td>Exclude (Expires: 00:04:18)</td>
</tr>
<tr>
<td>Last reporter:</td>
<td>10.0.1.100</td>
</tr>
<tr>
<td>Source list is empty</td>
<td></td>
</tr>
</tbody>
</table>

**Related Commands**

None

2.19 **show ip igmp groups interface**

Use this command to show the information about igmp groups on interface.

**Command Syntax**

```
show ip igmp groups IFNAME [group-address ] [detail ]
```

<table>
<thead>
<tr>
<th>IFNAME</th>
<th>Interface name</th>
</tr>
</thead>
<tbody>
<tr>
<td>group-address</td>
<td>Specify multicast group address</td>
</tr>
<tr>
<td>detail</td>
<td>Detailed Information</td>
</tr>
</tbody>
</table>

**Command Mode**

Privileged EXEC

**Default**

None
Usage
None

Examples
This example shows how to display the information about igmp groups on interface eth-0-1.
Switch# show ip igmp groups eth-0-1

<table>
<thead>
<tr>
<th>IGMP Connected Group Membership</th>
</tr>
</thead>
<tbody>
<tr>
<td>Group Address</td>
</tr>
<tr>
<td>227.0.0.1</td>
</tr>
</tbody>
</table>

Related Commands
None

2.20  **show ip igmp groups count**

Use this command to show igmp group number.

Command Syntax

```
show ip igmp groups (IFNAME) count
```

<p>|</p>
<table>
<thead>
<tr>
<th>IFNAME</th>
<th>Interface name</th>
</tr>
</thead>
</table>

Command Mode
Privileged EXEC

Default
None

Usage
None

Examples
This example shows how to display the igmp group number on interface eth-0-1.
Switch# show ip igmp groups eth-0-1 count

Dynamic multicast groups count: 1
Static multicast groups count: 0
Total multicast groups count: 1

Related Commands
None

2.21  **show ip igmp interface**

Use this command to show the information about igmp on interface.

Command Syntax

```
show ip igmp interface (IFNAME)
```
<table>
<thead>
<tr>
<th>IFNAME</th>
<th>Interface name</th>
</tr>
</thead>
</table>

**Command Mode**

Privileged EXEC

**Default**

None

**Usage**

None

**Examples**

This example shows how to display the information about igmp on interface eth-0-1.

Switch# show ip igmp interface eth-0-1

```
Interface eth-0-1 (Index 1)
IGMP Enabled, Active, Querier, Version 2 (default)
Internet address is 10.0.1.1
IGMP interface limit is 8192
IGMP interface has 1 group-record states
IGMP activity: 97 joins, 0 leaves
IGMP query interval is 125 seconds
IGMP querier timeout is 255 seconds
IGMP max query response time is 10 seconds
Last member query response interval is 1000 milliseconds
Group Membership interval is 260 seconds
Last member query count is 2
Robustness Variable is 2
```

3 IGMP Snooping Commands

3.1 ip igmp snooping

Use this command to enable igmp snooping.
To disable igmp snooping, use the no form of this command.

Command Syntax

```text
ip igmp snooping (vlan vlan_id | )
no ip igmp snooping (vlan vlan_id | )
```

| vlan vlan_id | Vlan ID, range is 1 to 4094. |

Command Mode

Global Configuration

Default

Enable

Usage

Igmp Snooping can be enabled globally and per vlan. By default, igmp snooping should be enabled globally and per vlan.

Examples

- This example shows how to enable igmp snooping.
  
  Switch(config)# ip igmp snooping
- This example shows how to disable igmp snooping.
  
  Switch(config)# no ip igmp snooping
- This example shows how to enable igmp snooping on vlan 10.
  
  Switch(config)# ip igmp snooping vlan 10
- This example shows how to disable igmp snooping on vlan 10.
  
  Switch(config)# no ip igmp snooping vlan 10

Related Commands

```text
show ip igmp snooping
```

3.2 ip igmp snooping fast-leave

Use this command to enable igmp snooping fast leave.
To disable it, use the no form of this command.

```text
ip igmp snooping fast-leave
```
Command Syntax

ip igmp snooping (vlan vlan_id | ) fast-leave
no ip igmp snooping (vlan vlan_id | ) fast-leave

| vlan vlan_id | Vlan ID, range is 1 to 4094. |

Command Mode

Global Configuration

Default

Disable

Usage

If igmp snooping fast leave is enabled on a vlan interface, on which igmp also is enabled.

Examples

- This example shows how to enable igmp snooping fast-leave.
  Switch(config)# ip igmp snooping fast-leave
- This example shows how to disable igmp snooping fast-leave.
  Switch(config)# no ip igmp snooping fast-leave

Related Commands

show ip igmp snooping global

3.3 ip igmp snooping last-member-query-interval

Use this command to set the last member query interval of igmp snooping.
To return it to default value, use the no form of this command.

Command Syntax

ip igmp snooping (vlan vlan_id | ) last-member-query-interval interval
no ip igmp snooping (vlan vlan_id | ) last-member-query-interval

| vlan vlan_id | Vlan ID, range is 1 to 4094. |
| interval | The last member query interval, range is 1000 to 25500(ms) |

Command Mode

Global Configuration

Default

1000 ms

Usage

Igmp last member query interval must be configurable per interface. The default value should be 1000ms and the range should be 1000-25500ms.
Examples

- This example shows how to set the last member query interval.
  Switch(config)# ip igmp snooping last-member-query-interval 2000
- This example shows how to return the last member query interval to default value.
  Switch(config)# no ip igmp snooping last-member-query-interval

Related Commands

- show ip igmp snooping
- show ip igmp snooping vlan

3.4 ip igmp snooping global source-address

Use this command to set the global source address.
To return it to default value, use the no form of this command.

Command Syntax

```
ip igmp snooping global source-address address
no ip igmp snooping global source-address
```

| **address** | The IPv4 address of source address |

Command Mode

Global Configuration

Default

0.0.0.0

Usage

None

Examples

- This example shows how to set the global source address to 1.3.4.5.
  Switch(config)# ip igmp snooping global source-address 1.3.4.5
- This example shows how to return the global source address to default value.
  Switch(config)# no ip igmp snooping global source-address

Related Commands

- show ip igmp snooping querier

3.5 ip igmp snooping max-member-num

Use this command to set the max allowed member number.
To return it to default value, use the no form of this command.

Command Syntax

```
ip igmp snooping (vlan vlan_id | ) max-member-num number
no ip igmp snooping (vlan vlan_id | ) max-member-num
```

| **vlan vlan_id** | Vlan ID, range is 1 to 4094. |
**Command Mode**

Global Configuration

**Default**

8192

**Usage**

None

**Examples**

- This example shows how to set the max member number of igmp snooping to 1024.
  
  Switch(config)# ip igmp snooping max-member-num 1024

- This example shows how to return the max member number to default value.
  
  Switch(config)# no ip igmp snooping max-member-num

**Related Commands**

- `show ip igmp snooping global`
- `show ip igmp snooping vlan`

### 3.6 ip igmp snooping query-interval

Use this command to set the igmp snooping query-interval.

To return the query-interval to default value, use the no form of this command.

**Command Syntax**

```
ip igmp snooping (vlan vlan_id | ) query-interval interval
no ip igmp snooping (vlan vlan_id | ) query-interval
```

<table>
<thead>
<tr>
<th><code>vlan vlan_id</code></th>
<th>Vlan ID, range is 1 to 4094.</th>
</tr>
</thead>
<tbody>
<tr>
<td><code>interval</code></td>
<td>The query-interval of igmp snooping (seconds), range is 2 to 18000</td>
</tr>
</tbody>
</table>

**Command Mode**

Global Configuration

**Default**

125

**Usage**

Query interval can't less than the igmp snooping query max response time.

**Examples**

- This example shows how to set the igmp snooping query interval to 64s.
  
  Switch(config)# ip igmp snooping query-interval 64

- This example shows how to return the query-interval to default value.
  
  Switch(config)# no ip igmp snooping query-interval
Related Commands

- show ip igmp snooping querier
- show ip igmp snooping querier vlan

3.7 ip igmp snooping query-max-response-time

Use this command to set the igmp snooping query-interval.
To return the query-interval to default value, use the no form of this command.

Command Syntax

- `ip igmp snooping (vlan vlan_id | ) query-max-response-time time`
- `no ip igmp snooping (vlan vlan_id | ) query-max-response-time`

<table>
<thead>
<tr>
<th>Configuration</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><code>vlan vlan_id</code></td>
<td>Vlan ID, range is 1 to 4094.</td>
</tr>
<tr>
<td><code>time</code></td>
<td>The query max response time (seconds), range is 1 to 25.</td>
</tr>
</tbody>
</table>

Command Mode

Global Configuration

Default

10

Usage

Query interval can't less than the igmp snooping query max response time.

Examples

- This example shows how to set the igmp snooping query max response time to 15s.
  Switch(config)# ip igmp snooping query-max-response-time 15
- This example shows how to return the query max response time to default value.
  Switch(config)# no ip igmp snooping query-max-response-time

Related Commands

- show ip igmp snooping querier
- show ip igmp snooping querier vlan

3.8 ip igmp snooping report-suppression

Use this command to enable report suppression.
To disable report suppression, use the no form of this command.

Command Syntax

- `ip igmp snooping (vlan vlan_id | ) report-suppression`
- `no ip igmp snooping (vlan vlan_id | ) report-suppression`

<table>
<thead>
<tr>
<th>Configuration</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><code>vlan vlan_id</code></td>
<td>Vlan ID, range is 1 to 4094.</td>
</tr>
</tbody>
</table>
3.9 **ip igmp snooping version**

Use this command to set igmp snooping version. To return it to default value, use the no form of this command.

**Command Syntax**

```
ip igmp snooping (vlan vlan_id |) version version
no ip igmp snooping (vlan vlan_id |) version
```

<table>
<thead>
<tr>
<th><strong>vlan vlan_id</strong></th>
<th>Vlan ID, range is 1 to 4094.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>version</strong></td>
<td>Igmp snooping version, range is 1 to 3.</td>
</tr>
</tbody>
</table>

**Command Mode**

Global Configuration

**Default**

2

**Usage**

The version of igmp snooping should be configurable globally and per vlan. The range of igmp snooping version should from 1 to 3. The default value should be 2.

**Examples**

This example shows how to set the igmp snooping version 1.

```
Switch(config)# ip igmp snooping version 1
```

**Related Commands**

```
show ip igmp snooping
show ip igmp snooping vlan
```
3.10 **ip igmp snooping discard-unknown**

Use this command to set discard unknown.
To disable discard unknown, use the no form of this command.

**Command Syntax**

```
ip igmp snooping \(\text{vlan} \ \text{vlan}_id \ | \ ) \ \text{discard-unknown}
no ip igmp snooping \(\text{vlan} \ \text{vlan}_id \ | \ ) \ \text{discard-unknown}
```

| vlan vlan_id | Vlan ID, range is 1 to 4094. |

**Command Mode**

Global Configuration

**Default**

Enable

**Usage**

None

**Examples**

This example shows how to enable discard-unknown multicast traffic.

```
Switch(config)# ip igmp snooping discard-unknown
```

**Related Commands**

- show ip igmp snooping
- show ip igmp snooping vlan

3.11 **ip igmp snooping querier tcn**

Use this command to set IGMP snooping querier TCN related parameters.

**Command Syntax**

```
ip igmp snooping querier tcn \(\text{query-count} \ \text{count} \ | \ \text{query-interval} \ \text{interval} \ )
no ip igmp snooping querier tcn \(\text{query-count} \ | \ \text{query-interval} \ )
```

<table>
<thead>
<tr>
<th>query-count count</th>
<th>IGMP querier TCN query count, range is 1 to 10, default is 2.</th>
</tr>
</thead>
<tbody>
<tr>
<td>query-interval interval</td>
<td>IGMP querier TCN query interval (sec), range is 1 to 255, default is 10s.</td>
</tr>
</tbody>
</table>

**Command Mode**

Global Configuration

**Default**

Enable
Usage

Igmp snooping tcn query counter must be configurable. The default value should be 2 and the range should be 1-10.
Igmp snooping tcn query interval must be configurable. The default value should be 10s and the range should be 1-255s.

Examples

This example shows how to use ip igmp snooping querier tcn command.
Switch(config)# ip igmp snooping querier tcn query-count 2

Related Commands

show ip igmp snooping querier

3.12 ip igmp snooping vlan access-group

Use this command to set igmp snooping access group on vlan.

Command Syntax

```
ip igmp snooping vlan vlan_id access-group acl
no ip igmp snooping vlan vlan_id access-group
```

<table>
<thead>
<tr>
<th>vlan_id</th>
<th>Vlan ID, range is 1 to 4094.</th>
</tr>
</thead>
<tbody>
<tr>
<td>acl</td>
<td>IP Named Standard Access list.</td>
</tr>
</tbody>
</table>

Command Mode

Global Configuration

Default

None

Usage

None

Examples

- This example shows how to use apply access-group on vlan 10.
  Switch(config)# ip igmp snooping vlan 10 access-group acl
- This example shows how to remove access-group from vlan 10.
  Switch(config)# no ip igmp snooping vlan 10 access-group

Related Commands

show ip igmp snooping vlan

3.13 ip igmp snooping vlan mrouter interface

Use this command to set igmp snooping mrouter interface on vlan.

Command Syntax

```
ip igmp snooping vlan vlan_id mrouter interface IFNAME
no ip igmp snooping vlan vlan_id mrouter interface IFNAME
```
**vlan_id** | Vlan ID, range is 1 to 4094.
---|---
**IFNAME** | Mrouter interface on this vlan

### Command Mode
Global Configuration

### Default
None

### Usage
None

### Examples
- This example shows how to set eth-0-1 as mrouter interface on vlan 10.
  
  Switch(config)# ip igmp snooping vlan 10 mrouter interface eth-0-1

- This example shows how to unset eth-0-1 as mrouter interface on vlan 10.
  
  Switch(config)# no ip igmp snooping vlan 10 mrouter interface eth-0-1

### Related Commands
- **show ip igmp snooping vlan**

### 3.14 ip igmp snooping vlan mrouter-aging-interval

Use this command to set igmp snooping mrouter interface aging interval on vlan.

#### Command Syntax
```
ip igmp snooping vlan vlan_id mrouter-aging-interval interval
no ip igmp snooping vlan vlan_id mrouter-aging-interval
```

<table>
<thead>
<tr>
<th><strong>vlan_id</strong></th>
<th>Vlan ID, range is 1 to 4094.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>interval</strong></td>
<td>Dynamic mrouter interface aging interval on this vlan(seconds)</td>
</tr>
</tbody>
</table>

#### Command Mode
Global Configuration

#### Default
255 seconds

#### Usage
None

#### Examples
- This example shows how to set dynamic mrouter interface aging interval as 100 seconds on vlan 10.
  
  Switch(config)# ip igmp snooping vlan 10 mrouter-aging-interval 100

- This example shows how to reset dynamic mrouter interface aging interval as default on vlan 10.
Switch(config)# no ip igmp snooping vlan 10 mrouter-aging-interval

### Related Commands

- show ip igmp snooping vlan

### 3.15 ip igmp snooping vlan querier

Use this command to enable igmp snooping querier on vlan.

#### Command Syntax

- `ip igmp snooping vlan vlan_id querier`
- `no ip igmp snooping vlan vlan_id querier`

| `vlan_id` | Vlan ID, range is 1 to 4094. |

#### Command Mode

- Global Configuration

#### Default

- Disable

#### Usage

- None

#### Examples

- This example shows how to enable querier on vlan 10.
  ```
  Switch(config)# ip igmp snooping vlan 10 querier
  ```
- This example shows how to disable querier on vlan 10.
  ```
  Switch(config)# no ip igmp snooping vlan 10 querier
  ```

### Related Commands

- show ip igmp snooping querier vlan

### 3.16 ip igmp snooping vlan querier address

Use this command to set igmp snooping querier address on vlan.

#### Command Syntax

- `ip igmp snooping vlan vlan_id querier address address`
- `no ip igmp snooping vlan vlan_id querier address address`

<table>
<thead>
<tr>
<th><code>vlan_id</code></th>
<th>Vlan ID, range is 1 to 4094.</th>
</tr>
</thead>
<tbody>
<tr>
<td><code>address</code></td>
<td>The address of querier on this vlan</td>
</tr>
</tbody>
</table>

#### Command Mode

- Global Configuration
Default
None

Usage
None

Examples
- This example shows how to set querier address on vlan 10.
  Switch(config)# ip igmp snooping vlan 10 querier address 1.1.1.1
- This example shows how to unset querier address on vlan 10.
  Switch(config)# no ip igmp snooping vlan 10 querier address

Related Commands
show ip igmp snooping querier vlan

3.17 ip igmp snooping vlan querier-timeout
Use this command to set igmp previous querier timeout interval on this vlan.

Command Syntax

```
ip igmp snooping vlan vlan_id querier-timeout interval
no ip igmp snooping vlan vlan_id querier-timeout
```

<table>
<thead>
<tr>
<th>vlan_id</th>
<th>Vlan ID, range is 1 to 4094.</th>
</tr>
</thead>
<tbody>
<tr>
<td>interval</td>
<td>The igmp previous querier timeout interval on this vlan(seconds), range is 60 to 300.</td>
</tr>
</tbody>
</table>

Command Mode
Global Configuration

Default
255

Usage
None

Examples
- This example shows how to set previous querier timeout interval as 100 seconds on vlan 10.
  Switch(config)# ip igmp snooping vlan 10 querier-timeout 100
- This example shows how to reset previous querier timeout interval on vlan 10.
  Switch(config)# no ip igmp snooping vlan 10 querier-timeout

Related Commands
show ip igmp snooping querier vlan

3.18 ip igmp snooping vlan static-group
Use this command to add static igmp group on this vlan.
**Command Syntax**

```
ip igmp snooping vlan vlan_id static-group group-address (source source-address |)
interface IFNAME
no ip igmp snooping vlan vlan_id static-group group-address (source source-address |)
interface IFNAME
```

| **vlan_id** | Vlan ID, range is 1 to 4094. |
| **group-address** | The address of group configured on the specified interface. |
| **source-address** | The address of source configured on the specified interface. |
| **IFNAME** | The interface configured as a member of specified group on this vlan |

**Command Mode**

Global Configuration

**Default**

None

**Usage**

None

**Examples**

- This example shows how to add group 238.1.1.1 on interface eth-0-11 of vlan 10.
  
  Switch(config)# ip igmp snooping vlan 10 static-group 238.1.1.1 interface eth-0-11

- This example shows how to remove group 238.1.1.1 from interface eth-0-11 of vlan 10.
  
  Switch(config)# no ip igmp snooping vlan 10 static-group 238.1.1.1 interface eth-0-11

**Related Commands**

- `show ip igmp snooping group`

**3.19 clear ip igmp snooping group**

Use this command to clear all igmp snooping groups.

**Command Syntax**

```
clear ip igmp snooping (group * |)
```

**Command Mode**

Privileged EXEC

**Default**

None

**Usage**

None

**Examples**

This example shows how to clear igmp snooping group all.
Switch# clear ip igmp snooping

**Related Commands**

### 3.20 clear ip igmp snooping vlan group

Use this command to clear igmp snooping groups on vlan.

**Command Syntax**

```
clear ip igmp snooping vlan vlan_id
```

<table>
<thead>
<tr>
<th><code>vlan_id</code></th>
<th>Vlan ID, range is 1 to 4094</th>
</tr>
</thead>
</table>

**Command Mode**

Privileged EXEC

**Default**

None

**Usage**

None

**Examples**

This example shows how to clear igmp snooping group on vlan 10.

Switch# clear ip igmp snooping vlan 10

**Related Commands**

None

### 3.21 show ip igmp snooping global

Use this command to show the global configurations of igmp snooping.

**Command Syntax**

```
show ip igmp snooping global
```

**Command Mode**

Privileged EXEC

**Default**

None

**Usage**

None

**Examples**

This example shows how to display the global configurations of igmp snooping.

Switch# show ip igmp snooping global

```
Global Igmp Snooping Configuration
----------------------------------------------
Igmp Snooping :Enabled
```

38
Igmp Snooping Fast-Leave : Disabled
Igmp Snooping Version : 2

**3.26 show ip igmp snooping mrouter**
Use this command to show the information of igmp snooping mrouter port on vlan.

**Command Syntax**
```
show ip igmp snooping mrouter (vlan vlan_id)
```

| vlan_id | Vlan ID, range is 1 to 4094. |
**Command Mode**
Privileged EXEC

**Default**
None

**Usage**
None

**Examples**
This example shows how to display the information of igmp snooping mrouter port on vlan 1.

Switch# show ip igmp snooping mrouter vlan 1

<table>
<thead>
<tr>
<th>Interface</th>
<th>Mode</th>
<th>Uptime</th>
<th>Expires-time</th>
</tr>
</thead>
<tbody>
<tr>
<td>eth-0/11</td>
<td>static</td>
<td>-</td>
<td>-</td>
</tr>
</tbody>
</table>

**Related Commands**
None

**3.27 show ip igmp snooping vlan**
Use this command to show the configurations of igmp snooping on vlan.

**Command Syntax**

```
show ip igmp snooping (vlan vlan_id)
```

<table>
<thead>
<tr>
<th>vlan_id</th>
<th>Vlan ID, range is 1 to 4094.</th>
</tr>
</thead>
</table>

**Command Mode**
Privileged EXEC

**Default**
None

**Usage**
None

**Examples**
This example shows how to display the configurations of igmp snooping on vlan 1.

Switch# show ip igmp snooping vlan 1

```
Global Igmp Snooping Configuration
-------------------------------------
Igmp Snooping :Enabled
Igmp Snooping Fast-Leave :Disabled
Igmp Snooping Version :2
Igmp Snooping Max-Member-Number :8192

Related Commands
None

3.28 show resource l2mcast
Use this command to display the resource statistic used by L2 mcast.

Command Syntax
    show resource l2mcast

Command Mode
    Privileged EXEC

Default
    None

Usage
    None

Examples
    The following is sample output from the show resource l2mcast command.
    Switch# show resource l2mcast

    | L2MCAST   | Resource   | Used | Capability |
    |-----------|------------|------|------------|
    | L2 Mcast Entry | 1          | 1024 |
    | L2 Mcast Member  | 2          | 8192 |

Related Commands
None
4.1 ip pim accept-register

Use this command to apply an access-list to limit the pim register message received by rp.
To remove this setting, use the no form of this command.

**Command Syntax**

```
ip pim accept-register list list
no ip pim accept-register
```

| list | The name of the access-list to be applied. |

**Command Mode**

Global Configuration

**Default**

None

**Usage**

This feature is used to prevent the unauthorized user registered to the switch.
When enable this feature, the system will send back a register stop message when the unauthorized register message is received.

**Examples**

- This example shows how to apply the access-list acl1 to limit the pim register message received by rp.
  
  ```
  Switch(config)# ip pim accept-register list acl1
  ```

- This example shows how to remove the limits.
  
  ```
  Switch(config)# no ip pim accept-register
  ```

**Related Commands**

None

4.2 ip pim anycast-rp

Use this command to set anycast rendezvous-point.
To remove the configurations, use the no form of this command.

**Command Syntax**

```
ip pim anycast-rp anycast_rp_address anycast_member_address
```
no ip pim anycast-rp anycast_rp_address (anycast_member_address)

<table>
<thead>
<tr>
<th>anycast_rp_address</th>
<th>Anycast rp address</th>
</tr>
</thead>
<tbody>
<tr>
<td>anycast_member_address</td>
<td>Anycast member rp address</td>
</tr>
</tbody>
</table>

**Command Mode**
Global Configuration

**Default**
None.

**Usage**
None

**Examples**
- This example shows how to set anycast rendezvous-point.
  Switch(config)# ip pim anycast-rp 10.10.10.1 10.10.10.11
- This example shows how to remove the member in anycast rendezvous-point.
  Switch(config)# no ip pim anycast-rp 10.10.10.1 10.10.10.11

**Related Commands**
None

### 4.3 ip pim bsr-candidate

Use this command to configure the candidate bootstrap router (candidate BSR).
To remove the configurations, use the no form of this command.

**Command Syntax**

```
ip pim bsr-candidate IFNAME (hash-mask (priority))
no ip pim bsr-candidate
```

<table>
<thead>
<tr>
<th>IFNAME</th>
<th>Interface name</th>
</tr>
</thead>
<tbody>
<tr>
<td>hash-mask</td>
<td>Hash mask length for RP selection, range is 0 to 32.</td>
</tr>
<tr>
<td>priority</td>
<td>Priority value for candidate bootstrap router, range is 0 to 255.</td>
</tr>
</tbody>
</table>

**Command Mode**
Global Configuration

**Default**
None

**Usage**
None

**Examples**
- This example shows how to configure the candidate BSR.
Switch(config)# ip pim bsr-candidate eth-0-1

- This example shows how to cancel the candidate BSR configured.
  Switch(config)# no ip pim bsr-candidate

Related Commands

4.4 ip pim bsr-border

Use this command to configure the border of pim domain.
To remove the configurations of the border of pim domain, use the no form of this command.

Command Syntax

  ip pim bsr-border
  no ip pim bsr-border

Command Mode

  Interface configuration

Default

None

Usage

None

Examples

- This example shows how to configure the border of pim domain.
  Switch(config-if)# ip pim bsr-border
- This example shows how to remove the configurations of the border of pim domain.
  Switch(config-if)# no ip pim bsr-border

Related Commands

4.5 ip pim dr-priority

Use this command to configure DR priority.
To return it to default value, use the no form of this command.

Command Syntax

  ip pim dr-priority priority
  no ip pim dr-priority

  priority | The DR priority, range is 0 to 4294967294.

Command Mode

  Interface configuration
Default

1

Usage

When a hello message without DR priority is received, it will be regarded to have the max DR priority and to be elected as DR. When more than one router's hello messages do not have DR priority, the one which have the highest ip address will be elected as DR.

Examples

- This example shows how to set the pim router DR priority to 1000.
  
  Switch(config-if)# ip pim dr-priority 1000

- This example shows how to return the pim router DR priority to default value.
  
  Switch(config-if)# no ip pim dr-priority

Related Commands

None

4.6 ip pim exclude-genid

Use this command to exclude generation id option from pim hello packets on this interface.

To return to the default setting, use the no form of this command.

Command Syntax

<table>
<thead>
<tr>
<th>Command</th>
<th>Syntax</th>
</tr>
</thead>
<tbody>
<tr>
<td>ip pim exclude-genid</td>
<td>no ip pim exclude-genid</td>
</tr>
</tbody>
</table>

| priority | The DR priority, range is 0 to 4294967294. |

Command Mode

Interface configuration

Default

Disable

Usage

None

Examples

- This example shows how to exclude generation id option from pim hello packets on this interface.
  
  Switch(config-if)# ip pim exclude-genid

- This example shows how to return the generation id option to the default setting.
  
  Switch(config-if)# no ip pim exclude-genid

Related Commands

None
4.7 **ip pim hello-interval**

Use this command to configure the interval for pim hello packets on this interface.
To return to the default setting, use the no form of this command.

**Command Syntax**

```
ip pim hello-interval interval
no ip pim hello-interval
```

<table>
<thead>
<tr>
<th>interval</th>
<th>The pim hello message interval (second), range is 1 to 65535.</th>
</tr>
</thead>
</table>

**Command Mode**

Interface configuration

**Default**

30 seconds

**Usage**

None

**Examples**

- This example shows how to set the pim hello message interval to 100s.
  Switch(config-if)# ip pim hello-interval 100
- This example shows how to return the pim hello message interval to default value.
  Switch(config-if)# no ip pim hello-interval

**Related Commands**

None

4.8 **ip pim ignore-rp-set-priority**

Use this command to ignore RP set priority value.
To not ignore the priority, use the no form of this command.

**Command Syntax**

```
ip pim ignore-rp-set-priority
no ip pim ignore-rp-set-priority
```

**Command Mode**

Global Configuration

**Default**

Disable

**Usage**

None

**Examples**

- This example shows how to ignore RP set priority value.
  Switch(config)# ip pim ignore-rp-set-priority
This example shows how to return the configurations to default value.
Switch(config)# no ip pim ignore-rp-set-priority

**Related Commands**
None

### 4.9 ip pim jp-timer

Use this command to set the join/prune timer value.
To return the timer to default value, use the no form of this command.

**Command Syntax**
- `ip pim jp-timer timer`
- `no ip pim jp-timer`

| timer | The Join/Prune timer value (second), range is 1 to 65535. |

**Command Mode**
Global Configuration

**Default**
60 seconds

**Usage**
None

**Examples**
- This example shows how to set the join/prune timer value to 100s.
  Switch(config)# ip pim jp-timer 100
- This example shows how to return the join/prune timer value to default value.
  Switch(config)# no ip pim jp-timer

**Related Commands**
None

### 4.10 ip pim neighbor-filter

Use this command to add an access-list to filter the neighbor.
To remove this filter, use the no form of this command.

**Command Syntax**
- `ip pim neighbor-filter list`
- `no ip pim neighbor-filter`

| list | The name of the access-list |

**Command Mode**
Interface configuration
Default

None

Usage

None

Examples

- This example shows how to establish neighbors based on access-list acl1.
  Switch(config-if)# ip pim neighbor-filter acl1
- This example shows how to cancel the filter.
  Switch(config-if)# no ip pim neighbor-filter

Related Commands

None

4.11 ip pim register-rate-limit

Use this command to set the rate limit for pim registers.
To return the rate limit to default value, use the no form of this command.

Command Syntax

```
ip pim register-rate-limit limit
no ip pim register-rate-limit
```

| limit | The rate limit for pim registers send from dr to rp |

Command Mode

Global Configuration

Default

None

Usage

There is no rate limit for pim registers by default.
When the rate limit is configured, the exceed pim register message will be dropped on the rp.

Examples

- This example shows how to set the rate limit for pim registers to 100 per second.
  Switch(config)# ip pim register-rate-limit 100
- This example shows how to cancel the rate limit.
  Switch(config)# no ip pim register-rate-limit

Related Commands

- ip pim register-rp-reachability
- ip pim register-source
- ip pim register-suppression
4.12 **ip pim register-source**

Use this command to set the source address for pim register.
To return the source address for pim register to default value, use the no form of this command.

**Command Syntax**

```
ip pim register-source IFNAME
no ip pim register-source
```

<table>
<thead>
<tr>
<th>IFNAME</th>
<th>The name of the interface. Use the address of this interface to be the source address for pim register</th>
</tr>
</thead>
</table>

**Command Mode**

Global Configuration

**Default**

The source address for pim register is the interface ip of dr by default.

**Usage**

None

**Examples**

- This example shows how to set the source address for pim register to the ip address of interface eth-0-1.
  
  Switch(config)# ip pim register-source eth-0-1

- This example shows how to return the source address for pim register to default value.
  
  Switch(config)# no ip pim register-source

**Related Commands**

- ip pim register-rate-limit
- ip pim register-rp-reachability
- ip pim register-suppression

4.13 **ip pim register-rp-reachability**

Use this command to enable rp reachability check for pim registers.
To disable this check, use the no form of this command.

**Command Syntax**

```
ip pim register-rp-reachability
no ip pim register-rp-reachability
```

**Command Mode**

Global Configuration

**Default**

Disable.
Usage
None

Examples
- This example shows how to enable rp reachability check for pim registers.
  Switch(config)#ip pim register-rp-reachability
- This example shows how to disable rp reachability check for pim registers.
  Switch(config)#no ip pim register-rp-reachability

Related Commands
  ip pim register-rate-limit
  ip pim register-source
  ip pim register-suppression

4.14 ip pim register-suppression
Use this command to set the register suppression time.
To return this time to default value, use the no form of this command.

Command Syntax
  ip pim register-suppression time
  no ip pim register-suppression

| time | The register suppression time in seconds, range is 11 to 65535 |

Command Mode
Global Configuration

Default
60 seconds

Usage
None

Examples
- This example shows how to set the register suppression time to 100s.
  Switch(config)# ip pim register-suppression 100
- This example shows how to return the register suppression time to default value.
  Switch(config)# no ip pim register-suppression

Related Commands
  ip pim register-rate-limit
  ip pim register-rp-reachability
  ip pim register-source

4.15 ip pim rp-address
Use this command to set the pim rp (rendezvous point) address.
To remove it, use the no form of this command.

**Command Syntax**

```
ip pim rp-address address ( list / override )
no ip pim rp-address address (list )
```

<table>
<thead>
<tr>
<th><strong>address</strong></th>
<th>The rp address</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>list</strong></td>
<td>The name of an access-list</td>
</tr>
<tr>
<td><strong>override</strong></td>
<td>Overrides dynamically learned RP mappings</td>
</tr>
</tbody>
</table>

**Command Mode**

Global Configuration

**Default**

None

**Usage**

None

**Examples**

- This example shows how to set the pim rp address to 1.1.1.1.
  
  Switch(config)# ip pim rp-address 1.1.1.1

- This example shows how to remove the rp address 1.1.1.1.
  
  Switch(config)# no ip pim rp-address 1.1.1.1

**Related Commands**

- ip pim rp-candidate
- ip pim rp-register-kat

### 4.16 ip pim rp-candidate

Use this command to set the candidate rp.

To remove the candidate rp, use the no form of this command.

**Command Syntax**

```
ip pim rp-candidate IFNAME  ( { priority priority | interval interval | group-list list } )
no ip pim rp-candidate ( IFNAME )
```

<table>
<thead>
<tr>
<th><strong>IFNAME</strong></th>
<th>The name of the interface to be the candidate rp</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>priority</strong></td>
<td>The Candidate-RP priority, range is 0 to 255</td>
</tr>
<tr>
<td><strong>interval</strong></td>
<td>The C-RP advertisement interval in seconds, range is 1 to 16383</td>
</tr>
<tr>
<td><strong>group-list</strong></td>
<td>Group ranges for this C-RP, only permit filters would be cared</td>
</tr>
</tbody>
</table>

**Command Mode**

Global Configuration
Default

None

Usage

None

Examples

- This example shows how to set the interface eth-0-1 to be the candidate rp.
  Switch(config)# ip pim rp-candidate eth-0-1
- This example shows how to cancel the configured candidate rp.
  Switch(config)# no ip pim rp-candidate eth-0-1

Related Commands

ip pim rp-address

4.17 ip pim rp-register-kat

Use this command to set the keepalive timer (KAT) for (S,G) at RP from PIM registers. To return this timer to default value, use the no form of this command.

Command Syntax

ip pim rp-register-kat time
no ip pim rp-register-kat

<table>
<thead>
<tr>
<th>time</th>
<th>The KAT time in seconds, range is 1 to 65535</th>
</tr>
</thead>
</table>

Command Mode

Global Configuration

Default

185 seconds

Usage

The register message send from dr will add an entry on rp. This entry will be aged when the keepalive timer expired which can be configured by this command.

Examples

- This example shows how to set the keepalive timer to 100s at RP from PIM registers.
  Switch(config)# ip pim rp-register-kat 100
- This example shows how to return this timer to default value.
  Switch(config)# no ip pim rp-register-kat

Related Commands

ip pim rp-address
ip pim rp-candidate
4.18 **ip pim spt-switch-threshold infinity**

Use this command to set the spt switch threshold to infinity.
To cancel this setting, use the no form of this command.

**Command Syntax**

```
ip pim spt-switch-threshold infinity (group-list list)
no ip pim spt-switch-threshold infinity (group-list list)
```

**group-list list** | Group address access list

**Command Mode**

Global Configuration

**Default**

The DR will switch to spt immediately when received the first multicast packet by default.

**Usage**

None

**Examples**

- This example shows how to set the spt switch threshold to infinity.
  ```
  Switch(config)# ip pim spt-switch-threshold infinity
  ```
- This example shows how to return the spt-switch-threshold to default.
  ```
  Switch(config)# no ip pim spt-switch-threshold infinity
  ```

**Related Commands**

`show ip pim sparse-mode spt-threshold`

4.19 **ip pim cisco-register-checksum**

Use this command to calculate register checksum over whole packet (cisco compatibility).
To remove this setting, use the no form of this command.

**Command Syntax**

```
ip pim cisco-register-checksum (group-list list)
no ip pim cisco-register-checksum (group-list list)
```

**group-list list** | Group address access list

**Command Mode**

Global Configuration

**Default**

The register checksum defined in RFC is used by default.
Usage

None

Examples

- This example shows how to set to calculate register checksum over whole packet.
  Switch(config)# ip pim cisco-register-checksum
- This example shows how to remove this setting.
  Switch(config)# no ip pim cisco-register-checksum

Related Commands

None

4.20  **ip pim sparse-mode**

Use this command to enable pim sparse mode on the interface.
To disable pim sparse mode, use the no form of this command.

**Command Syntax**

```
ip pim sparse-mode (passive/)
nop ip pim sparse-mode (passive/)
```

| passive | Pim passive mode (local members only) |

**Command Mode**

Interface configuration

**Default**

Disable

**Usage**

The pim hello message will not be sent out from the interface when the passive mode is configured.

**Examples**

- This example shows how to enable pim sparse mode on the interface.
  Switch(config-if)# ip pim sparse-mode
- This example shows how to disable pim sparse mode on the interface.
  Switch(config-if)# no ip pim sparse-mode
- This example shows how to enable pim sparse mode passive on the interface.
  Switch(config-if)# ip pim sparse-mode passive

**Related Commands**

None

4.21  **ip pim unicast-bsm**

Use this command to enable sending and receiving of unicast BSM for backward compatibility.
To cancel this setting, use the no form of this command.
**Command Syntax**

```
ip pim unicast-bsm
no ip pim unicast-bsm
```

**Command Mode**

Interface configuration

**Default**

Disable

**Usage**

Interface will send BSM message to the whole pim domain by default.

**Examples**

- This example shows how to enable sending and receiving of unicast BSM for backward compatibility.
  - Switch(config-if)# ip pim unicast-bsm
- This example shows how to cancel this setting.
  - Switch(config-if)# no ip pim unicast-bsm

**Related Commands**

None

### 4.22  **ip pim ssm**

Use this command to enable pim-ssm and set ssm group range. To cancel this setting, use the no form of this command.

**Command Syntax**

```
ip pim ssm (default | range list)
no ip pim ssm
```

<table>
<thead>
<tr>
<th></th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>default</td>
<td>Use 232/8 group range for SSM</td>
</tr>
<tr>
<td>range list</td>
<td>ACL for group range to be used for SSM</td>
</tr>
</tbody>
</table>

**Command Mode**

Global Configuration

**Default**

Disable

**Usage**

Enable pim-ssm and set ssm group range.

**Examples**

- This example shows how to enable pim-ssm and set ssm group range to default.
  - Switch(config-if)# ip pim ssm default
- This example shows how to cancel this setting.
  - Switch(config-if)# no ip pim ssm default

4.29 show ip pim sparse-mode rp-hash

Use this command to show the information of rp to be chosen based on group selected.

Command Syntax

```
show ip pim sparse-mode rp-hash group_address
```

<table>
<thead>
<tr>
<th>group_address</th>
<th>Multicast group address</th>
</tr>
</thead>
</table>

Command Mode

Privileged EXEC

Default

None

Usage

None

Examples

This example shows how to display the information of rp to be chosen based on group 224.0.0.10.
Switch# show ip pim sparse-mode rp-hash 224.0.0.10

| RP: 12.0.9.2 |
| Info source: 12.0.9.2, via bootstrap |

Related Commands

None

4.30 show ip pim sparse-mode spt-threshold

Use this command to show the rpt to spt threshold of pim sparse mode.

Command Syntax

```
show ip pim sparse-mode spt-threshold
```

Command Mode

Privileged EXEC
Default
None

Usage
None

Examples
This example shows how to display the rpt to spt threshold of pim sparse mode.
Switch# show ip pim sparse-mode spt-threshold

Related Commands
None
5.1 **mvr**

Use this command to enable or disable MVR.

**Command Syntax**

```
mvr
no mvr
```

**Command Mode**

Global Configuration

**Default**

Disable

**Usage**

Enable MVR in the Switch, before enable MVR, must disable ip multicast-routing.

**Examples**

This example shows how to enable MVR.

```
Switch(config)# no ip multicast-routing
Switch(config)# mvr
```

**Related Commands**

- `show mvr`

5.2 **mvr vlan**

Use this command to specify the MVR source vlan.

**Command Syntax**

```
mvr vlan vlan_id
no mvr vlan
```

<table>
<thead>
<tr>
<th><code>vlan_id</code></th>
<th>Vlan ID, range is 1 to 4094</th>
</tr>
</thead>
</table>

**Command Mode**

Global Configuration

**Default**

None
Usage

The related vlan interface should be created before the configuration of the MVR source vlan.

Examples

This example shows how to configure source vlan of MVR.

configure vlan 2 as source vlan of MVR
Switch(config)# vlan database
Switch (config-vlan)# vlan 2
Switch (config)# interface vlan 2
Switch (config-if)# exit
Switch(config)# mvr vlan 2

Related Commands

interface vlan

5.3 mvr group

Use this command to configure global group for MVR.

Command Syntax

mvr group address (count /)
no mvr group address (count /)

<table>
<thead>
<tr>
<th>address</th>
<th>Multicast group address</th>
</tr>
</thead>
<tbody>
<tr>
<td>count</td>
<td>Count of contiguous groups, between 1 and 64</td>
</tr>
</tbody>
</table>

Command Mode

Global Configuration

Default

None

Usage

This command is used to create or delete a global static group.

Examples

This example shows how to create global static group from 238.255.0.1 to 238.255.0.50
Switch(config)# mvr group 238.255.0.1 50

Related Commands

None

5.4 mvr source-address

Use this command to create or delete mvr source address.

Command Syntax

mvr source-address address
no mvr source-address

<table>
<thead>
<tr>
<th>address</th>
<th>Source ip address</th>
</tr>
</thead>
</table>

**Command Mode**
Global Configuration

**Default**
10.0.0.1

**Usage**
This command is used to create or delete mvr source vlan ip address. The default IP address is 10.0.0.1.

**Examples**
Create mvr source address:
Switch(config)# mvr source-address 192.168.11.1
Resume mvr source address as default IP address.
Switch(config)# no mvr source-address

**Related Commands**
None

5.5 **mvr type**
Use this command to configure a switch-port as source port or receiver port.

**Command Syntax**

```
mvr type (source | receiver vlan vlan_id )
no mvr type (receiver vlan vlan_id )
```

<table>
<thead>
<tr>
<th>source</th>
<th>MVR source port</th>
</tr>
</thead>
<tbody>
<tr>
<td>receiver</td>
<td>MVR receiver port</td>
</tr>
<tr>
<td>vlan vlan_id</td>
<td>MVR receiver vlan</td>
</tr>
</tbody>
</table>

**Command Mode**
Interface configuration

**Default**
None

**Usage**
Configure the interface as source port or receiver port. The source port must belong to source vlan, and the receiver port must not belong to source vlan.

**Examples**
Configure the eth-0-1 as source port, and configure the eth-0-2 as receiver port of vlan 2.
Switch(config)# interface eth-0-1
Switch(config-if)# mvr type source
Switch(config)# interface eth-0-2
Switch(config-if)# mvr type receiver vlan 2

**Related Commands**

None

### 5.6 show mvr

Use this command to show mvr information.

**Command Syntax**

```
show mvr
```

**Command Mode**

Privileged EXEC

**Default**

None

**Usage**

Show mvr information.

**Examples**

Switch# show mvr

```
MVR Running: TRUE
MVR Multicast VLAN: 10
MVR Source-address: 1.1.1.1
MVR Max Multicast Groups: 1024
MVR Hw Rt Limit: 508
MVR Current Multicast Groups: 0
```

**Related Commands**

None

### 5.7 show mvr interface

Use this command to show mvr interface information.

**Command Syntax**

```
show mvr interface
```

**Command Mode**

Privileged EXEC

**Default**

None

**Usage**

Show mvr interface information.

**Examples**

Switch# show mvr interface
### Related Commands

None

### 5.8 `show mvr group`

Use this command to show mvr group learned from receiver port.

#### Command Syntax

```
show mvr group vlan vlan_id (group_address | )
```

<table>
<thead>
<tr>
<th><code>vlan vlan_id</code></th>
<th>MVR receiver vlan</th>
</tr>
</thead>
<tbody>
<tr>
<td><code>group_address</code></td>
<td>Multicast group address</td>
</tr>
</tbody>
</table>

#### Command Mode

Privileged EXEC

#### Default

None

#### Usage

Show mvr group information learned from receiver port

#### Examples

Switch# show mvr groups

<table>
<thead>
<tr>
<th>VLAN</th>
<th>Interface</th>
<th>Group-Address</th>
<th>Uptime</th>
<th>Expires-time</th>
</tr>
</thead>
<tbody>
<tr>
<td>11</td>
<td>eth-0-1</td>
<td>227.0.0.1</td>
<td>00:25:51</td>
<td>00:04:19</td>
</tr>
</tbody>
</table>

### Related Commands

None

### 5.9 `show mvr group static`

Use this command to show mvr global static groups.

#### Command Syntax

```
show mvr group static global
```

#### Command Mode

Privileged EXEC

#### Default

None

#### Usage

Show mvr static configured group information.

#### Examples

Switch# show mvr groups static global
Related Commands
None

5.10  show resource mvr

Use this command to display the resource statistic used by MVR.

Command Syntax
  show resource mvr

Command Mode
  Privileged EXEC

Default
None

Usage
None

Examples
Switch# show resource mvr

<table>
<thead>
<tr>
<th>MVR</th>
<th>Used</th>
<th>Capability</th>
</tr>
</thead>
<tbody>
<tr>
<td>MVR Entry</td>
<td>10</td>
<td>508</td>
</tr>
<tr>
<td>L2 Mcast Member</td>
<td>11</td>
<td>4064</td>
</tr>
</tbody>
</table>
